

The Corporation of the City of Courtenay

Bylaw No. 3203

A bylaw to establish zones and regulate the use of land, buildings and structures in the City of Courtenay.

A bylaw to repeal and replace "Zoning Bylaw No. 2500, 2007"

WHEREAS Division 5 of Part 14 of the *Local Government Act* authorizes a municipality to adopt a zoning bylaw to divide the municipality into zones and regulate the use, density, and siting of land, buildings and structures;

AND WHEREAS said division further provides that the Council of the Corporation of the City of Courtenay may by bylaw, regulate within the zones, the use of land, buildings and structures; regulate the density of the use of land, buildings and structures; and the area, shape and dimensions of all parcels of land that may be created by *subdivision* under the *Land Title Act* or the *Condominium Act*;

AND WHEREAS the Council of the Corporation of the *City* of Courtenay deem it necessary and expedient to revise and update the zoning regulations in the *City* of Courtenay;

AND WHEREAS the "Official Community Plan Bylaw No. 3070, 2022" has been adopted;

AND WHEREAS land use regulation within the City of Courtenay is intended to support the objectives of the Official Community Plan;

NOW THEREFORE the Council of the Corporation of the City of Courtenay in open meeting assembled, enacts as follows:

DIVISION 1 TITLE

1.1 This Bylaw may be cited for all purposes as "Zoning Bylaw No. 3203".

DIVISION 2 ADMINISTRATION

Part 1 Application

- 2.1.1 This Bylaw shall be applicable to all land, *buildings* and *structures* therein of the Corporation of the *City* of Courtenay.
- 2.1.2 For the purpose of this Bylaw the schedules referred to herein are attached hereto, and form an integral part of this Bylaw.

Part 2 Other Legislation

- 2.2.1 Nothing contained in this Bylaw shall relieve any person from the responsibility to seek out and comply with other legislation applicable to their undertaking.
- 2.2.2 Where land is within an agricultural land reserve created pursuant to the *Agricultural Land Commission Act* and amendments thereto and if any portion of this Bylaw is in any way contrary to, in conflict with, inconsistent with or repugnant to the Act, the Act shall prevail.

Part 3 Enforcement

- 2.3.1 The Director of Development Services, or their appointed designate, shall determine whether the regulations under this Bylaw are being observed and is hereby authorized to enter any *building* or property for the purpose of enforcing this Bylaw.

Part 4 General Prohibition

- 2.4.1 It shall be unlawful for any person to cause, suffer, or permit any *building* or *structure* to be constructed, reconstructed, altered, moved, extended or used, or land to be occupied or used, in contravention of this Bylaw or otherwise to contravene or fail to comply with this Bylaw.

Part 5 Violation

- 2.5.1 Any person who violates any of the provisions of this Bylaw, or who suffers or permits any act or thing to be done in contravention of this Bylaw, or who neglects to do or refrains from doing any act or thing which is required to be done by any of the provisions of this Bylaw, shall be deemed to have violated the provisions of this Bylaw.

Part 6 Penalty

- 2.6.1 Any person who causes, permits or allows anything to be done in contravention or violation of this Bylaw, or who neglects or fails to do anything required to be done pursuant to this Bylaw, commits an offence and is liable upon summary conviction to pay a fine of not more than \$50,000, plus the costs of prosecution, and any other penalty or remedy available under the *Community Charter and Offence Act*.

- 2.6.2 Each day during which such violation is continued shall be deemed to constitute a new and separate offence.
- 2.6.3 This Bylaw may be enforced by bylaw notice pursuant to the “Municipal Enforcement Bylaw No. 3185”, as amended or replaced.

Part 7 Appeal

- 2.7.1 The Board of Variance established under the Board of Variance Bylaw of the *City of Courtenay* shall hear and determine any appeal pursuant to the *Local Government Act*.

Part 8 Severability

- 2.8.1 Headings in this Bylaw are for convenience only and must not be construed as defining or limiting its scope or intent. If any part of this Bylaw is held invalid by a court of competent jurisdiction, the invalid part is severed, and the remainder continues to be valid.

DIVISION 3 INTERPRETATION

Part 1 Definitions

Unless otherwise provided in this Bylaw, words and phrases used herein have the same meaning as *the Local Government Act, Community Charter, or Land Title Act*, as the context and circumstances may require. A reference to a statute in this Bylaw refers to a statute of the Province of British Columbia unless otherwise indicated, and a reference to any statute, regulation, bylaw or other enactment refers to that enactment as it may be amended or replaced from time to time.

- 6.3.9 The *home occupation* may operate within an *accessory building* that is no larger than 50.0 m².
- 6.3.10 Provides for the off-*street* parking of all vehicles associated with the *residence* and business under the requirements of Division 7. The *front yard* shall not be considered as constituting the required *parking spaces* to be provided.
- 6.3.11 Any person intending to carry on a *home occupation* shall apply for a business licence pursuant to the regulations of the City of Courtenay Business Licence Bylaw.
- 6.3.12 *Cannabis production facility* is prohibited as a *home occupation*.

Part 4 Garage Sales

- 6.4.1 Garage Sales (including *yard*, moving and other similar types of sales) are permitted as an *accessory* use in residential zones, subject to the following requirements:
- (1) A garage sale may not occur on more than 4 days in a calendar year.
 - (2) A garage sale may occupy no more than 100.0 m² in area; and
 - (3) A garage sale may not involve the sale of new goods.

Part 5 Siting of Development Adjacent to or on Watercourse

- 6.5.1 Floodplain construction specifications are established in "The *City of Courtenay Floodplain Management Bylaw No. 1743, 1994*" and must take into consideration the most up-to-date floodplain mapping information.
- 6.5.2 No houseboat, float camp or other *building, structure*, or vessel used or intended to be used for temporary or permanent *residence* shall be located on any *watercourse*.
- 6.5.3 The following *setbacks* are required for any *development* adjacent to a *watercourse*. Where more than one *setback* is applicable, the greater distance shall be required:
- (1) 30.0 m from the *natural boundary* of the Puntledge River, Tsolum River and Courtenay River;
 - (2) 15.0 m from the *natural boundary* of Morrison Creek, Piercy Creek, Milliard Creek and any other *watercourse*;
 - (3) 15.0 m from the *natural boundary* of the ocean; and
 - (4) 7.5 m from the *natural boundary* of a lake, marsh or pond.

Part 6 Siting and Height Exceptions

Siting Exceptions

- 6.6.1 Where chimneys, cornices, leaders, gutters, pilasters, sills, decks, landings or ornamental features project beyond the face of a *building*, the minimum distance to an abutting *lot line* as permitted elsewhere in this Bylaw may be reduced by not more than 0.6 m providing that such reduction shall apply only to the projecting feature. For a permitted zero *lot line* no feature shall project over the *lot line*.
- 6.6.2 Cantilevered extensions will be permitted to a maximum depth of 0.6 m and a length of 2.2 m for areas above the first *storey* of a *building*.
- 6.6.3 Freestanding lighting poles, warning devices, utility poles, wires, and flagpoles may be sited on any portion of a *lot*.
- 6.6.4 No *principal building* or *structure* shall be located in any required *front, side* or *rear yard*.
- 6.6.5 Wheelchair ramps are permitted to extend into *front, side, and rear yard setbacks*.
- 6.6.6 A maximum of 2 m extension into *front, side, and rear yard setback* is permitted for stairs and a landing.
- 6.6.7 Decks less than 0.6 m in height are permitted to encroach into the *rear yard setback* by 2 m.
- 6.6.8 Heat pumps are permitted to be within 1 m of a *side yard* and *rear yard setback*, but not closer to a *lot line* than 0.3 m and may not be located in the *front setback* or *front yard*.

Height Exceptions

- 6.6.9 Water towers as a utility use shall not be subject to the *building height* requirements of this Bylaw provided that no such *structure* shall cover more than 20 percent of the *lot*.
- 6.6.10 *Church* spires, belfries, monuments, fire and hose towers, chimneys, transmission towers, aerials,

elevator housing, flag poles, rooftop cooling towers, and ham radio towers provided that no such shall exceed 1.2 times the maximum permitted height of a *building* in that zone, and no such *structure* shall cover more than 20 percent of the *lot*, or if located on a *building*, not more than 10 percent of the roof area of the *building* on which the *structure* is located.

6.6.11 *Telecommunication Antenna Systems* regulated by Innovation, Science and Economic Development Canada are exempt from maximum allowable height and siting permitted by the zone in this Bylaw.

Part 7 Sight Triangle

6.7.1 On any *corner lot*, except for the second and subsequent stories of a *building* in the Commercial One Zone (C-1), nothing shall be erected, placed, planted or allowed to grow in such a manner as to impede vision between a *height* of 1.0 m and 3.0 m above the centre line grade of the intersecting *street* in the area bounded by the property lines of such *corner lots* and a line joining points along said property lines 6.0 m from the point of the *street* intersection as illustrated in Figure 4.

Figure 4: Sight Triangle

Part 8 Fences

- 6.8.1 In the residential zones the maximum *height* for a *fence* in or along the *front yard* shall be 1.25 m and in or along the side or *rear yards* shall be 2.0 m.
- 6.8.2 In all zones other than residential zones the maximum *height* for a *fence* shall be 2.0 m except where provided for in other parts of this Bylaw.
- 6.8.3 *Fences* erected on *corner lots* are subject to Section 6.7.1 of this Bylaw.
- 6.8.4 The *height* of a *fence* or wall shall be determined by measurement from the ground level at the average grade level within 1.0 m of both sides of such *fence*, wall or hedge.
- 6.8.5 The installation of electrical, barbed or razor wire fencing is prohibited in all Residential and *Multi-residential* zones.
- 6.8.6 Every *private swimming pool* whether existing or proposed shall be enclosed with a sturdy, non-climbable *fence* not less than 1.5 m in *height* and no openings greater than 0.1 m in their least dimension. This *fence* may enclose the pool itself or any portion of the premises on which the pool is situated.
- 6.8.7 Where only the pool area is fenced, the fencing shall be such that the pool is open to full view through the *fence*. Such *fence* will be continuous except for points of access which shall be equipped with a self-closing gate, so designed as to cause the gate to return to a locked position when not in use and secured by a spring, located not less than 1.0 m above grade, and which can only be opened from the swimming pool side of the *fence*.
- 6.8.8 Every gate in every *fence* which provides access to a *private swimming pool* shall be kept in a lock-closed position while any water remains in the swimming pool and shall only be opened for the purpose of access to or egress from said pool during such period.
- 6.8.9 Every *fence* enclosing a *private swimming pool* shall be maintained by the owner or occupier of real property on which the same is situated, in good order and repair and adequate to perform its intended function and in addition all sagging gates, loose parts, worn latches and locks and all broken or binding members shall be promptly and adequately replaced or repaired.
- 6.8.10 The siting of *private swimming pools* shall be in accordance with the applicable zoning regulations for *accessory structures*.

Part 9 Prefabricated, Modular or Factory-Made Dwelling Units

- 6.9.1 Prefabricated, modular or factory made *dwelling units* that are certified under CSA Z-240 or A-277 are permitted: provided that such a *dwelling unit* is a minimum of 6.5 m in width, exclusive of carports, verandas, cabanas, porches, stairways, or any other extension whatsoever to the

original prefabricated, modular, or factory made *dwelling unit*. Individual single-wide *dwelling units* including those certified under CSA Z-240 are not permitted, except in a *MH-1* or *MH-2 Zone*.

Part 10 Parking and Storage of Commercial or Derelict Vehicles or Refuse

- 6.10.1 Unless specifically permitted, no *parcel* shall be used for the wrecking or storage of derelict vehicles or refuse or as a *wrecking yard*.
- 6.10.2 Any vehicle which has not been licenced for over a period of one (1) year and which is not housed in a *garage* or carport shall be deemed to be a derelict vehicle or junk.
- 6.10.3 Only the following shall be parked or stored, on any Residential or *Mobile home* zoned property:
- (1) one commercial vehicle not exceeding 907.0 kg rate capacity;
 - (2) trucks, commercial vehicles or equipment required for the construction, repair, servicing or maintenance of the premises; and
 - (3) recreational boats, trailers, recreational vehicle, and vehicles for the personal use of the occupants of the property.

Part 11 Signs

- 6.11.1 Signs are permitted only in accordance with and subject to the provisions of the Sign Bylaw of the *City* and amendments thereto.

Part 12 Subdivision for Relative

- 6.12.1 No *subdivision* shall be permitted pursuant to Section 514 of the *Local Government Act*, on lands within Agricultural Land Reserve, unless the parent *parcel* is a minimum of 10.0 ha in size. Any *parcel* created by *subdivision* under this section shall be not less than 1.0 ha in size.
- 6.12.2 A *lane* shall not be considered road frontage for the purposes of frontage affecting *subdivision*.

Part 13 Landscaping Requirements

- 6.13.1 Wherever possible, *landscaping* and screening areas will retain existing trees and natural vegetation and add planting that enhances the natural environment.
- 6.13.2 Any part of a *lot* not used for *building*, parking, loading facilities or outdoor recreation shall be fully and properly landscaped and maintained and separated from the paved areas by a concrete curb or other barrier to the satisfaction of the *City*.
- 6.13.3 Where a *lot* adjoins the Agricultural Land Reserve a *fence* and landscape buffer of 10.0 m in width shall be provided inside the property line.
- 6.13.4 *Landscaping* for each *building* and the surrounding area shall be completed within twelve (12) months of the date of issuance of the final *building* inspection approval by the *City*.

Part 14 Bed and Breakfast Accommodations

6.14.1 *Bed and breakfast accommodation* may be allowed in any residential dwelling, subject to the following requirements:

- (1) Not more than two bedrooms are used for transient accommodation.
- (2) Principal use of the *building* shall be for use as a *single residential* unit.
- (3) The *household* shall be solely engaged in the operation of the transient accommodation business.
- (4) No meals shall be provided to the customers of the operation other than breakfast.
- (5) No liquor shall be supplied to customers.

6.14.2 At least one automobile *parking space* shall be provided on the same *lot* for each room available for transient accommodation, in addition to the parking requirements for the *residence*, but *parking spaces* may be behind other *parking spaces* on the same *lot*

Part 15 Lot Size and Lot Frontage Exceptions

6.15.1 Despite the requirements in respect of minimum *lot* frontage and minimum *lot* size set out in this Bylaw, a *lot* may be created if:

- (1) the existing *lot* is lawfully non-complying with respect to the *lot* size or *lot* frontage or both; and
- (2) the *lot* thereby created improves the existing situation and has a *lot* size and *lot* frontage greater than that of the existing non-conforming size and frontage of the existing *parcel*;
- (3) the creation of the non-conforming *parcel* thereby does not cause to create non-conforming siting, size, or frontage of the adjacent *lots*; and
- (4) no additional *lots* are being created.

Part 16 Prohibited Uses in All Zones

6.16.1 Unless specifically permitted in this Bylaw, the use of land, water, *buildings* or *structures* for the following purpose is prohibited:

- (1) *Cannabis production facility*: except as permitted by the Agricultural Land Reserve Use Regulations.
- (2) A *cannabis production facility* is permitted on land located with the Agricultural Land Reserve when it is in compliance with the following:
 - (i) maximum *lot coverage* is 35%
 - (ii) maximum *building* height is 15 m
 - (iii) a minimum 30.0 m *setback* for all *structures* from all property *lot lines* for a *cannabis production facility*
 - (iv) a 30.0 m *setback* from any *watercourse*
 - (v) a 150.0 m *setback* from a *cannabis production facility* to *parks* and *schools*

- (vi) a 30.0 m maximum *setback* from a *cannabis production facility* to non-ALR residential uses with a buffer, or a 60.0 m maximum *setback* if a buffer is not employed
- (vii) a stormwater and agricultural liquid waste management plans will be required if the total impervious area of *cannabis buildings* and *structures* exceeds 3,700.0 m² or covers more than 10%
- (3) *Storefront cannabis retailer* except as approved through rezoning.
- (4) The bottling of water except where the source of the water is the municipal water supply, supplied directly to the property on which the bottling is taking place.
- (5) *Drive through facility*

Part 17 Urban Agriculture

6.17.1 *Urban Agriculture* is allowed as an *accessory* use to any *single residential* dwelling, subject to the following:

- (1) *Urban agriculture* activity shall not generate odour, waste, noise, smoke, glare, fire hazard, visual impact, or any other hazard or nuisance, in excess of that which is characteristic of the zone in which it is located under normal circumstances wherein no *urban agriculture* exists.
- (2) A *produce sales stand* is permitted on all *lots* allowing *urban agriculture* for the sale of *urban agriculture* products grown on the *lot* subject to the following:
 - (i) a *produce sales stand* is considered an *accessory structure* subject to the requirements of the applicable zone that:
 - i. the *produce sales stand* shall have a floor area of not more than 5.0 m²;
 - ii. the *produce sales stand* shall not exceed a height of 2.5 m;
 - iii. the *produce sales stand* must be located entirely on the *lot* in which the produce is grown; and
 - iv. a *produce sales stand* may be located within the *front yard*
 - (ii) a *produce stand* must only sell produce grown on the *lot* where it is located;
 - (iii) sales are only permitted between 7am and 7pm daily;
 - (iv) a *produce sales stand* must be removed seasonally when not in use; and,
 - (v) there shall only be one non-illuminated sign, which shall not exceed 0.4 m² in area.
- (3) Beekeeping is permitted on all *lots* allowing *urban agriculture* subject to the following:
 - (i) *lots* have a minimum width of 15.0 m;
 - (ii) *lots* have a minimum *lot area* of 550.0 m²;
 - (iii) hives shall be located at least 6.0 m from all property lines;
 - (iv) hives shall be registered with the Provincial authority, BC Ministry of Agriculture and Lands;
 - (v) only two hives with colonies shall be permitted on each *lot*; and

- (vi) honey production is for personal consumption only.
- (4) The keeping of hens is permitted on all *lots* allowing *urban agriculture* subject to the following:
 - (i) A hen coop is considered an *accessory structure* subject to the requirements of the applicable zone except that a coop shall only be permitted in the *rear yard*;
 - (ii) the maximum number of hens shall be six (6) per *lot*;
 - (iii) roosters are not permitted;
 - (iv) the sale of eggs, manure and other products associated with the keeping of hens is prohibited,
 - (v) coops and runs shall be maintained in a clean condition and the coop shall be kept free of obnoxious odours, substances and vermin;
 - (vi) stored manure shall be kept in an enclosed *structure* such as a compost bin and no more than 3.0 m³ shall be stored at any one time; and,
 - (vii) home slaughter of hens is prohibited and any deceased hens shall be disposed of at a livestock disposal facility or through the services of a veterinarian.

Part 18 Secondary Suites and Accessory Dwelling Units

6.18.1 The following conditions shall apply to *secondary suites* and *accessory dwelling units*:

- (1) *Secondary suite(s)* and *accessory dwelling unit(s)* shall be permitted as *accessory* to a detached *single residential dwelling* or *duplex dwelling* on a *lot*, *occupied or intended to be occupied as a single residence*, where only such principal residential uses are permitted, subject to all other regulations in this Bylaw, and as may be governed by the development regulations of a particular zone. No subdivision of a secondary suite or accessory dwelling unit shall be permitted.
- (2) The minimum floor area of a *secondary suite* or *accessory dwelling unit* shall be:
 - i. 30.0 m² for a *studio* unit;
 - ii. 45.0 m² for a one-bedroom unit;
 - iii. 65.0 m² for a two-bedroom unit; and
 - iv. 85.0 m² for a three-bedroom unit.
- (3) An *accessory dwelling unit* shall not exceed 6.5 m in height, unless otherwise specified in the development regulations of a particular zone.
- (4) Parking shall be in conformance with the regulations of this Bylaw.
- (5) Where a *secondary suite* or *accessory dwelling unit* is permitted, a minimum area of 15 m² of *private amenity space* shall be provided per *dwelling unit* unless otherwise specified in this Bylaw. The *private amenity space* shall have a direct connection to the habitable space and be defined and screened through the use of *landscaping* such as: plantings, architectural elements such as a trellis, low *fences*, planters or changes in elevation.

Part 19 Short-term Rental Accommodation

6.19.1 *Short-term rental accommodation* may be permitted within any *dwelling unit* subject to the following conditions:

- (1) The *short-term rental accommodation* may only be permitted within the following *dwelling unit* types: *single residential dwelling*, *accessory dwelling unit*, or *secondary suite* as part of a *single residential dwelling*;
- (2) No more than one *short-term rental accommodation* is permitted per *parcel*;
- (3) *Short-term rental accommodation* is not permitted in combination with *bed and breakfast accommodation* or *day care* use on the same *parcel*;
- (4) The maximum number of bedrooms for *short-term rental accommodation* use is three (3) and the owner of the *parcel* shall not allow more than six (6) guests to occupy the *dwelling unit* as part of the *short-term rental accommodation*;
- (5) Parking for the *short-term rental accommodation* must be provided in accordance with the parking and loading regulations of this bylaw;
- (6) The *short-term rental accommodation* shall only be operated by the owner of the *parcel*;
- (7) *Short-term rental accommodation* is not permitted unless the *principal residence* of the owner of the *parcel* is on the *parcel*;
- (8) No noise, vibration, smoke, dust, odors, heat, glare, electrical or radio disturbance detectable beyond the property boundary shall be produced by the *short-term rental accommodation*; and
- (9) The owner of the *parcel* must hold a valid Business Licence in accordance with the Business Licence Bylaw currently in effect.

6.19.2 Notwithstanding Section 6.20.1.6, the *principal residence* requirement does not apply to a property in respect of which a property host holds a fractional interest if the property may not be used as a *principal residence* by any person due to mandatory provisions in the applicable fractional ownership agreement, in accordance with *Short-Term Rental Accommodations Act*.

Part 20 Permitted Uses

6.20.1 The following uses are permitted in all zones:

- (1) *Accessory buildings*
- (2) *Accessory structures*
- (3) *Parks*
- (4) *Transportation corridor and*
- (5) *Utility facility, public*

Part 21 Temporary Uses – Buildings and Structures

6.21.1 The following uses, *buildings* or *structures* shall be permitted only to the extent expressly provided herein:

- (1) Temporary *structures* or *buildings* may be erected for the following purposes:
 - (i) to provide shelter for construction or maintenance personnel; or

- (ii) To store materials associated with the construction or maintenance of a utility, *building*, or *structure* for which a valid *building* permit has been issued. Such temporary *structures* or *buildings* shall be removed by the earlier of the following:
 - i. thirty (30) days following the completion of the permanent utility, *building*, or *structure*; or
 - ii. twelve (12) months from the date of erection or installation of the temporary *structure* or *building*.

6.21.2 Temporary accommodation within a *recreational vehicle* is permitted during the construction of a residential dwelling provided a *building* permit has been issued for the *lot* and is in good standing. This accommodation shall not include the rental, lease, or other commercial use of *recreational vehicles* for occupancy purposes.

DIVISION 7

OFF-STREET PARKING AND LOADING SPACE

Part 1 Off-Street Parking Space Requirements

7.1.1 Location

Where the provisions of the bylaw require allowance for the *off-street parking spaces* and *loading spaces*, every owner of land shall, upon the *lot* in question, provide and maintain *off-street parking spaces* and *loading spaces* in conformance with the minimum standards set out in this Division. Where vehicular access is required on a controlled access highway listed below, the BC Ministry of Transportation and Highways access approval is also required prior to the approval by the *City*:

- (i) Island Highway (Highway 19A from 29th Street to Ryan Road).
- (ii) Ryan Road (from Highway 19A to Anderton Road).
- (iii) South Inland Island Highway Connector (29th Street from Piercy Road to Highway 19A).

7.1.2 General Requirements

- (1) The minimum number of *off-street parking spaces* shall be provided in accordance with Schedule 7A of this Bylaw.
- (2) If a use is not listed in Schedule 7A, the number of spaces shall be calculated on the basis of a similar use that is listed as determined by the *City*.
- (3) If more than one use is located on a *parcel* or involves collective parking for more than one *building* or use, the total number of spaces shall be the sum of the various classes of uses calculated separately, and a space required for one use or a *loading space* shall not be included in calculations for any other use. However, parking and *loading space* requirements for churches/places of worship and associated *assembly halls* or classrooms shall be the greater of the requirements for the two uses calculated separately, provided the two are not used concurrently.
- (4) Where the calculation of total required spaces results in a fractional number, the nearest, greater, whole number above that calculation shall be taken.
- (5) *Off-street vehicle loading space* required by this Bylaw shall not be credited as required *off-street parking space*.
- (6) *Parking spaces* required in accordance with this Bylaw shall not include any *parking spaces* used or intended to be used for the storage of goods or parking of vehicles for rent or gain, display or sale.
- (7) *Parking spaces* required in accordance with this Bylaw shall be constructed and available for use at the time of final *building* inspection approval by the *City*.

7.1.3 Stall and Aisle Dimensions

All *off-street parking spaces* and aisles shall be developed in accordance with Schedule 7B of this Bylaw.

7.1.4 Access

All parking areas shall have access to a public thoroughfare, such access to be not less than 4.57 m not more than 9.14 m in width. The location of all points of access and egress from a public

road to a parking area and all of the traffic patterns within the parking area shall be subject to the approval of the Municipal Engineer.

7.1.5 Vertical Clearance

The minimum vertical clearance of parking stalls and aisles shall be 2.25 m.

7.1.6 Specifications

- (1) Every *off-street motor* vehicle parking area required by this Bylaw to accommodate two or more vehicles shall be surfaced with a dust-free surface.
- (2) Every *off-street* motor vehicle parking area required by this Bylaw shall have:
 - (i) the individual *parking spaces*, maneuvering aisles, entrances and exits clearly marked by curbs or *fences*, lines and signs.
 - (ii) *fences* and curbs to prevent the crossing of sidewalks and boulevards except at authorized exits or entrances.
- (3) All parking and *loading spaces* shall have a maximum gradient and cross slope of 6%.
- (4) Any lighting used to illuminate any parking area shall be so arranged that all direct rays of light fall upon the parking area and not on any adjoining premises and every *off-street* motor vehicle parking area required by this Bylaw shall adequately lighted.
- (5) No *off-street parking spaces* shall be permitted to overhang any public sidewalk. Where a sidewalk is required along a highway, the minimum distance between the *off-street* parking and the property line shall be a landscaped strip of 1.5 m.
- (6) Visitor *parking spaces* shall be clearly marked by signs or by painting markings on the pavement.
- (7) Where a *parking space* or maneuvering aisle abuts a wall or *building*, the width of the *parking space* or maneuvering aisle as determined by Schedule 7B shall be increased by an additional 0.6 m.
- (8) The minimum distance from the face of a *garage* or carport to a property line or private internal access road excluding a public *lane* must be 6.0 m

7.1.7 Off-Site Parking

- (1) Where all required parking spaces cannot be provided on the same parcel, required parking spaces may be located on another parcel within 225.0 m of the parcel that the space is intended to serve; does not include parking spaces for dwelling units.
- (2) The provisions of required off-site parking shall be secured by a parking covenant registered against the land to ensure the terms of the permitted use, maintenance and termination.
- (3) Within the C-1 - Central Commercial Zone an owner may, at his option in lieu of supplying an individual parking site or *structure* on the same site as the *principal use*, or otherwise, pay to the *City of Courtenay* a sum of money per *parking space* so required. The sum of money per *parking space* shall be six thousand five hundred dollars (\$6,500.00). All such monies paid to the *City* shall be placed in a Special Reserve Fund which shall be committed to the purchase of public *off-street* parking sites and *structures* within or immediately adjacent to the downtown as the *City* may see fit.

7.1.7 Spaces for People with Disabilities

- (1) When any *development, building* or use requires or provides more than 20 (twenty) *off-street parking spaces*, one *parking space* shall be provided for the use of persons with a physical disability, together with one additional space for a person with a disability for each additional 75 (seventy-five) *off-street parking spaces* required or provided.
- (2) Each space for a person with a disability shall be a minimum of 4.0 m in width.
- (3) Each space for a person with a disability shall be marked with the International Symbol of Accessibility for people with a disability as specified in Schedule 7C of this Bylaw.
- (4) Each space for a person with a disability shall be located within convenient access of the *development, building* or use that it is intended to serve, and with minimum changes in level.

7.1.9 Existing Buildings and Structures

Nothing in this Bylaw shall be construed to require *off-street parking spaces* for a *building* or *structures* existing at the effective date of this Bylaw, so long as the *building* or *structure* continues to be put to a use that does not require more parking or *loading spaces* than were required for the use existing at the time the bylaw came into force. Where a change in use results in additional parking or *loading spaces* being required then the number of spaces to be provided will be the difference between the *parking space* requirements for the previous use and the present use.

7.1.10 Small Car Parking

- (1) Every *off-street* motor vehicle parking area required by this bylaw to accommodate twenty (20) or more vehicles, may provide up to 10% of the total number of parking stalls for small cars.
- (2) Every small car parking stall shall be a minimum of 2.5 m in width and 4.6 m in length.
- (3) Aisle dimensions shall be developed in accordance with Schedule 7B of this bylaw.
- (4) All designated small car stalls shall be clearly marked.

7.1.11 Parking Amenity (Multi-Residential Dwelling)

- (1) The following provisions are applicable to multi-residential dwellings as specified below for:
 - (i) Apartments 2 to 4 inclusive
 - (ii) Townhouses 3 and 4
- (2) Where parking spaces are provided within a principal building an amount may be added to the floor area ratio (FAR) equal to 0.20 multiplied by the percentage of the total parking spaces which are provided in this manner.
- (3) Where: 15 m² = area of parking space
- (4) Within the area shown on Schedule 7D, attached hereto and forming part of this bylaw, parking can be reduced to 1 space per unit for all multi residential developments. Where this option is utilized the landscaping requirement would be provided equivalent to:
 - (i) 15 m² x the number of parking spaces reduced

7.1.12 Standards for the Installation and Maintenance of Signs and Lines in *Parking lots* and Access Roads

(1) Curbs – painting colours

- (i) Yellow indicates no parking is allowed
- (ii) Red indicates no stopping at any time as the curb protects a bus stop location
- (iii) White indicates special parking or stopping provisions, e.g., commercial vehicle

Areas delineated by white paint should be qualified by signs. It is also recommended that yellow curbs have qualifying signage, e.g., No Parking, No Stopping, Fire Lane.

(2) Medians

The nose at each end of the median may be painted yellow. It is not necessary to paint the entire median curb. A divider sign to indicate the median and the traffic flow direction around the median is required.

(3) Dividing Island

Where the traffic flows in the same direction on each side of the island, it may have the curbs painted white.

(4) Parking Stall Lines

Should be painted with white paint in accordance with the *City's* parking requirements in the zoning bylaw.

(5) Stop Signs

If stop signs are installed in order to control traffic movements, stop bars may be provided and painted white. If the stop bars are installed on two-way roads or parking areas then a yellow delineating line is also required leading up to the stop bar.

(6) Crosswalks

If they are installed at 90° to the traffic flow at a stop bar then the crosswalk is to be two parallel white lines.

If the crosswalk is not at a stop sign area then it is to be zebra crosswalk painted white

(7) Speed Bumps

If installed should be painted with yellow paint. It is recommended that speed bumps are also signed to alert the public to the change in road profile.

(8) Stop or Yield Traffic Areas

If it is intended to have one or more *lanes* of traffic yield to another *lane(s)*, the yield signs are to be installed.

If multi-way stops are intended then Stop signs are to be installed with the appropriate tab sign.

(9) Directional Arrows

Painted directional arrows on road surfaces should be white and of standard size.

(10) Public Access

Public access, landing and drop-off areas shall be painted with yellow diagonal lines.

7.1.13 Parking Reductions within the Walkable Areas

- (1) Properties zoned Residential Small-Scale Multi-Unit Housing (R-SSMUH) within the estimated walking distance shown on Schedule 7E may have the total amount of parking required on a property reduced by one space.

Part 2 Off-Street Loading Space Requirements

7.2.1 Every owner of land which is the site of a *structure* or *yard* involved in the receipt or delivery of goods or materials by vehicles shall, on the *lot* in question, provide and maintain *off-street loading spaces* which shall conform to the following minimum standards:

- (1) All *off-street loading spaces* shall be a minimum of 9.0 m in length 3.0 m in width and 4.0 m for vertical clearance.

- (3) *Side yard*: 1.5 m on one side and 3.0 m on the other side and 4.5 m where the *side yard* flanks a *street*

8.12.9 Height of Building or Structure

No *building* or *structure* shall be greater in *height* than 4.5 m except for a service, storage or recreation *building* which shall not be greater than 6.0 m.

8.12.10 Mobile homes per Space/Lot

No more than one *mobile home* shall be located on a *mobile home space*.

8.12.11 Skirtings

No *mobile home* in a *mobile home park* may be occupied as a dwelling unless:

- (1) skirtings are installed within 60 days of installation of the *mobile home* on a *mobile home pad* which shall have two easily removable access panels of a minimum width of 1.2 m, one providing direct access to the area enclosed by the skirting for inspection or servicing the service connections to the *mobile home*, and the other providing access to the area enclosed by the skirting for storage;
- (2) skirtings installed are factory prefabricated or of equivalent quality and painted or prefinished so that the design and construction compliment the main *structure*; and
- (3) skirtings installed have ventilation openings that conform to the requirements of the British Columbia Building Code and the ground cover of the crawl space shall conform to the requirements of the British Columbia Building Code.

8.12.12 Permissible Additions

- (1) All additions or *accessory structures* to a *mobile home* located in a *mobile home park* including carports, *garages*, shelters, porches, vestibules, and room shall require a *building* permit and be constructed in compliance with the current British Columbia Building Code.
- (2) All attached or *accessory structures* such as porches, sun room, additions and storage facilities shall be factory prefabricated units or an equivalent quality and shall be painted or prefinished so that the design and construction shall compliment the main *structure*.

8.12.13 Buffer Strip

Every *mobile home park* shall have immediately within its boundaries, a buffer area of a minimum of 7.5 m in depth, within which:

- (1) No recreation, amenity or service areas may be located;
- (2) No *mobile home space* or an owner's residential plot may be located;
- (3) No *building* or *structure* may be erected or located;
- (4) No garbage disposal area shall be located;
- (5) Except where danger is involved no plant material may be removed nor may any substance of which land is composed be deposited or removed, except as part of a recognizable beautification scheme approved by the authority having jurisdiction; and
- (6) No roads except those which cross it as close to right angles as practical to connect the roadway to the highway.

8.12.14 Owner's/Manager's Residential Plot

- (1) An owner's/manager's residential plot shall be permitted within a *mobile home park* if the area of the plot is not less than 465.0 m² with a frontage of 20.0 m.
- (2) An owner's/manager's residential plot shall include sufficient area to provide two off-street parking spaces for owner's/manager's use and a minimum of 2 parking spaces for visitors and customers.

8.12.15 Parking

- (1) Two *parking spaces* measuring a minimum of 2.75 x 5.5 m shall be provided within each *mobile home pad*. In addition, for every 4 *mobile homes*, an additional *parking space* shall be provided within the *mobile home park*.
- (2) *Parking spaces* shall be graded for proper drainage and be paved and dust free.

8.12.16 Accessory Buildings and Accessory Structures

- (1) Shall have a floor area not exceeding 45.0 m² or 10% of the *rear yard* whichever is greater;
- (2) Shall be permitted in the side and rear boundary of the *mobile home space* provided they are within 1.5 m from the side and rear boundary of the *mobile home space* except where the side boundary flanks a *street* in which case the minimum distance shall be 4.5 m; and

8.12.17 Tenant Storage

- (1) One or more separate storage compounds shall be provided within a *mobile home park* for the storage of boats, trailers, recreation vehicles, or other large item owned by the tenants that are not appropriate to store on a *mobile home lot*.
- (2) The storage compound shall be securely fenced, gated and lighted for security reasons and shall be screened from public view by fencing or *landscaping* approved by the *City*.
- (3) Only communal *buildings* owned by the owner of the *mobile home park* shall be constructed in the storage compound for the sole use of the residents of the *mobile home park*.
- (4) No outdoor portion of a *mobile home park* shall be used for or permitted to be used for the wrecking or storage of derelict automobiles, trucks, tractors, machinery, lumber, flammable debris or other unused item or equipment that the *City* considers being a public nuisance or junk.

8.12.18 Recreation and Landscaped Areas

- (1) Not less than 20.0 m² per *mobile home space* shall be devoted to tenant's recreational uses, and shall be provided in a convenient and accessible location. For the purpose of calculating recreational space requirements, any indoor recreational space provided shall be counted as double its actual area.
- (2) The recreation areas shall not include buffer areas, *accessory buildings*, *mobile home spaces*, roadways and storage areas.
- (3) Recreation areas shall be provided with suitable equipment, the safety of design and construction of which shall be subject to the approval of the *City*.
- (4) All recreation areas and other areas in the *mobile home park*, other than *mobile home pads*, roadways and parking areas shall be suitably landscaped and maintained subject to the approval of the *City*.
- (5) Recreational areas and open spaces shall be connected to the internal *street* and walkway system of the *development* and such areas and spaces shall be provided in one or more convenient and accessible locations.

8.12.19 Access, Roadways and Walkways

- (1) Access
 - (i) No *mobile home park* shall be established or extended unless the highway access to the *mobile home park* is approved by the *City*.
 - (ii) A second access from a public highway separated by at least 60.0 m from the first access shall be provided to each *mobile home park* containing 50 or more *mobile home spaces*.
- (2) Roadways
 - (i) All *mobile home spaces*, owner's residential plot, storage areas and service *buildings* as well as other facilities where access is required shall have access by roadways.
 - (ii) Minimum roadway width requirements shall be as follows:
 - i. with parking on one side shall have a minimum paved width of 9.0 m and a right-of-way of 12.0 m.
 - ii. with no parking shall have a minimum paved width of 7.2 m and right-of-way of 12.0 m.
 - iii. one way minor roads shall not exceed 150.0 m in length unless connected to a secondary road access, and cul-de-sacs shall not exceed 60.0 m in length as measured from the centre line of a connecting roadway to the centre of the cul-de-sac turn around.
 - iv. cul-de-sacs shall have a minimum turning circle right-of-way radius of 14.0 m and a minimum pavement radius of 12.5 m.
 - v. all *streets* and roadways in the *mobile home park* shall be designed, constructed and paved in accordance with the *City of Courtenay Engineering Design Standards and Specifications* and certified by a Professional Engineer registered in BC.
 - vi. adequate *street* lighting shall be designed by a Professional Engineer to the *City's* standards and policies and installed and energized prior to the issuance of any occupancy permit(s) by the *City*. Such lighting shall meet the *City of Courtenay Engineering Design Standards and Specifications* and maintained to adequately illuminate the traveled portion of the roadway including all intersections, the turning circle of cul-de-sacs, any point at which an internal roadway changes direction 30 degrees or more, and any off-*street* visitor parking areas and storage areas in accordance with the "TAC Guide for Design of Roadway Lighting".
- (3) Walkways and Sidewalks
 - (i) A hard-surfaced walkway of minimum 1.5 m in width shall be provided to facilitate access from or within the *mobile home park* to any public open space, recreation areas, neighbourhood or public *school*.
 - (ii) A walkway or sidewalk shall be provided on at least one side of a main distributor road within the *mobile home park*.

- (iii) Walkways may be required for direct access to recreation or multi-purpose service centres if roadways are not direct.
- (iv) Cul-de-sacs having more than 10 *lots* including the *corner lots* shall be provided with a sidewalk.

8.12.20 Water Supply

- (1) The owner of a *mobile home park* shall provide a water supply system that is connected directly to the municipal water supply system. The water system shall be designed by a Professional Engineer in accordance with engineering requirements, specifications and bylaw, regulations of the *municipality* and Regional Public Health Engineer.
- (2) Water service shall be distributed to:
 - (i) each service *building*
 - (ii) each *mobile home space*
 - (iii) fire hydrants
- (3) Water shall not be distributed to any terminal from which the water would not be intercepted by an approved sewage fixture, nor to any space that is not provided with an approved *mobile home* drain terminal connected to a sewer as required.
- (4) Each water distribution branch line servicing a *mobile home space* for the use of a *mobile home*, shall have a minimum diameter of 19.0 mm.
- (5) The water terminal on each *mobile home space* shall conform to the engineering standards and specifications required by the *City*.
- (6) Hydrants for fire protection shall be provided and located within 90.0 m of each *manufactured home lot*, as measured along the *street* frontage. Hydrants shall not be located more than 200.0 m apart and shall be installed in accordance with the requirements of the *City*.
- (7) Upon completion of construction, the owner of the *mobile home park* shall provide to the *City* as-built drawings of the water system, certifying the constructed quality of the works, signed and sealed by a Professional Engineer.
- (8) Meter boxes are required to be installed at the property line or back of roadway for all *mobile home lots* for the subsequent installation of water meter in accordance with *City* standards.

8.12.21 Sanitary Sewerage and Waste Water Disposal System

- (1) The owner of a *mobile home park* shall provide for the disposal of all waste water and of all body wastes that are generated within the *mobile home park* by providing a sewer system connected to all plumbing fittings and sewage laterals in the *mobile home pads*. The sewer system shall be connected directly into the municipal sewage disposal system and shall be designed and constructed by a Professional Engineer in accordance with the engineering requirements, specifications, bylaw and regulations of the *City* and the BC Plumbing Code.
- (2) The sewer terminal on each *mobile home space* shall conform to the engineering standards and specifications required by the *City*.

- (3) Upon completion of construction, the owner of the *mobile home development* shall provide to the *City* as-built drawings of the sewage and wastewater disposal system with the construction quality of works certified by a Professional Engineer.

8.12.22 Garbage Disposal

The owner of a *mobile home park* shall dispose of garbage or refuse in accordance with the *City* of Courtenay Refuse Collection and Removal Bylaw No. 2244, 2002 and revisions thereto.

8.12.23 Supervision and Reporting

- (1) Every *mobile home park* shall be kept free of flammable debris and rubbish at all time.
- (2) The owner shall report the installation or replacement of *mobile homes* and additions in the *mobile home park*, with the exception of skirting, to the *City*.

8.12.24 Occupancy

No person shall cause or permit a *mobile home park* to be occupied by *manufactured homes* until advised in writing by the Building Inspector that authorization to do so is given.

8.15.3 Minimum Lot Frontage

A *lot* shall have a frontage of not less than 20.0 m.

8.15.4 Density

The maximum *density* shall not exceed a *floor area ratio* of 0.6. However, where parking is provided within the principal *building* the *floor area ratio* can be increased by 0.2 multiplied by the percentage of the total *parking spaces* which are provided within the principal *building*.

8.15.5 Lot Coverage

A *lot* shall not be covered by *buildings* and *accessory buildings* to a greater extent than 40% of the total area of the *lot*.

8.15.6 Setbacks

Except where otherwise specified in this bylaw the following minimum *building setbacks* shall apply:

- (1) *Front yard:* 7.5 m
- (2) *Rear yard:* 7.5 m
- (3) *Side yard:* 7.5 m
9.0 m for 3rd *storey*

8.15.7 Height of Building

The *height* of a *building* shall not exceed 9.5 m.

8.15.8 Useable Open Space

Useable open space shall be provided on a *lot* in the amount of:

- (1) 20.0 m² per *dwelling unit* within an *apartment building*; or
- (2) 30.0 m² per one bedroom *dwelling unit* and 50.0 m² per *dwelling unit* with two or more bedroom.

8.15.9 Accessory Buildings and Accessory Structures

- (1) Shall not be located within 4.5 m from the side and *rear lot line*
- (2) Shall not be situated closer than 3.0 m from the *principal building* which the *accessory building* serves

8.15.10 Off-Street Parking and Loading

Off-street parking and loading shall be provided and maintained in accordance with the requirements of Division 7 of this bylaw.

8.15.11 Landscaping and Screening

In addition to the Landscape Requirements identified in Part 14 of this bylaw, the following landscape requirements shall be met:

- (1) Where a *lot* adjoins a residential or *institutional* use or adjoins 17th Street, 29th Street, Cliffe Avenue, Cumberland Road, Island Highway, Lerwick Road, Mission Road or Ryan Road a landscaped area of at least 7.5 m in width extending along the entire frontage of the property shall be provided inside the property line. Where a *lot* in this zone adjoins any other *street*, a landscaped area of at least 4.5 m in width extending along the entire frontage of the property on the *street* shall be provided inside the property line.
- (2) To separate parking, internal roads, services or storage areas from adjacent properties, a landscaped buffer area of at least 2.0 m in width and 2.0 m in *height* shall be provided along the inside of all property lines.
- (3) Loading areas, garbage and recycling containers shall be screened and gated to a minimum *height* of 2 m by a *landscaping* screen or solid decorative *fence* or a combination thereof.

8.15.12 Special Regulations

- (1) Garbage containers and passive recycling containers shall not be located within any required *setback* adjacent any residential *lot*.
- (2) The outdoor storage or display of any goods, materials or supplies is specifically prohibited, notwithstanding any other provision in this Part.
- (3) A *Day care* shall be located on the *lot* such that these centres have direct access to an open space and play area within the *lot*.

Part 16 - Multiple Use Four Zone (MU-4)

8.16.1 Permitted Uses

In the MU-4 zone, the following uses are permitted and all other uses are prohibited, except as otherwise noted in this bylaw:

- (1) **Residential**
 - (i) *Single residential dwelling*
 - (ii) *Duplex dwelling*
 - (iii) *Multi-residential dwelling*
 - (iv) *Accessory buildings and structures*
 - (v) *Home occupation*
- (2) **Commercial**
 - (i) *Bakery and deli*
 - (ii) *Care facility*
 - (iii) *Community service*
 - (iv) *Craft industry with wholesale and accessory retail sales*
 - (v) *Day care*
 - (vi) *Electrical and plumbing sales and service*
 - (vii) *Enclosed storage facility*
 - (viii) *Fitness facility*
 - (ix) *Florist*
 - (x) *Manufacturing*
 - (xi) *Office*
 - (xii) *Laundromat*
 - (xiii) *Medical clinic*

The *height* of a *building* shall not exceed 9.5 m.

8.16.8 Useable Open Space

Useable open space shall be provided on a *lot* in the amount of:

(1) 20.0 m² per *dwelling unit* within an *apartment building*; or

(2) 30.0 m² per one-bedroom *dwelling unit* and 50.0 m² per *dwelling unit* with two or more bedroom.

8.16.9 Accessory Buildings and Accessory Structures

- (1) Shall not be situated closer than 3.0 m from the *principal building* that the *accessory building* serves

8.16.10 Off-Street Parking and Loading

Off-street parking and loading shall be provided and maintained in accordance with the requirements of Division 7 of this bylaw.

8.16.11 Landscaping and Screening

In addition to the Landscape Requirements identified in Part 14 of this bylaw, the following landscape requirements shall be met:

- (1) Where a *lot* adjoins a residential or *institutional* use or adjoins 17th Street, 29th Street, Cliffe Avenue, Cumberland Road, Island Highway, Lerwick Road, Mission Road or Ryan Road a landscaped area of at least 7.5 m in width extending along the entire frontage of the property shall be provided inside the property line. Where a *lot* in this zone adjoins any other *street*, a landscaped area of at least 4.5 m in width extending along the entire frontage of the property on the *street* shall be provided inside the property line.
- (2) To separate parking, internal roads, services or storage areas from adjacent properties, a landscaped buffer area of at least 2.0 m in width and 2.0 m in *height* shall be provided along the inside of all property lines.
- (3) Loading areas, garbage and recycling containers shall be screened and gated to a minimum *height* of 2 m by a *landscaping* screen or solid decorative *fence* or a combination thereof.

8.16.12 Special Regulations

8.63.10 Landscaping and Screening

In addition to the Landscape Requirements in Part 14 of this bylaw, the following landscape requirements shall be met:

- (1) *Landscaping* shall be used to ensure privacy and to complement the overall *development*.
- (2) A 4.5 m landscape buffer in the rear and *front yard*, except for the driveway.
- (3) A 1.5 m landscape buffer for both *side yards*, except for the driveway and garbage enclosure.

THE CITY OF COURTENAY
Attachment "B"
 Part of Bylaw No. 3037, 2023
 Amendment to the
 Zoning Bylaw No. 2500, 2007

Part 64 - Comprehensive Development Zone (CD-41) - 120 11th Street

8.64.1 Intent

The CD-41 Zone is intended to accommodate a *rental apartment development* on the properties legally described as:

- (1) Lot A, Section 69, Comox District, Plan 32204;
- (2) Lot 2, Section 69, Comox District, Plan 6674;
- (3) Lot 1, Section 69, Comox District, Plan 6674; and
- (4) That part of Lot 10, Section 69, Comox District, Plan 3030, taken for road purposes and containing .27 of an acre more or less, shown in red on Plan 284 BL.

These properties shall be developed in accordance with Schedule A which forms part of this zone.

8.64.2 Permitted Uses

The following uses are permitted and all other uses are prohibited except as otherwise noted in this bylaw:

- (1) *Rental apartment*
- (2) *Accessory structures*

8.64.3 Floor Area Ratio

Provided that all other applicable size, shape and siting conditions are met, the maximum *floor area ratio* for *rental apartment* shall not exceed 1.0 floor area ratio.

8.64.4 Minimum Lot Size

A *lot* shall have an area of not less than 6,000.0 m².

8.64.5 Setbacks

Except where otherwise specified in this bylaw the following minimum *building setbacks* shall apply:

- (1) *Front yard:* 10.5 m.
- (2) *Rear yard:* 30.0 m, except at the site's northeast corner where it is 25.0 m in accordance with Schedule A.
- (3) *Side yard (SE):* 4.5 m.
- (4) *Side yard (NW):* 0.5 m to the stairwell exit, otherwise 2.5 m.

8.64.6 Height of Building

The height of a *building* shall not exceed 18.5 m.

8.64.7 Useable Open Space

In this zone, the calculation of *useable open space* may include common outdoor areas and balconies attached to individual rental units and shall be provided in the amount of 13.0 m² per rental unit as shown in Schedule A.

8.64.8 Accessory Structures

Accessory structures shall not be permitted except for *structures* related to the useable outdoor space identified in Schedule A.

8.64.9 Off-Street Parking and Loading

Off-street parking shall be provided and maintained in accordance with the requirements of Division 7 of this bylaw except:

- (1) 99 *parking spaces* shall be provided, being 79 standard stalls and 20 small car stalls. Of the 99 stalls ten are reserved for visitor parking. 1 stall is to be reserved for a car share and a minimum of 20 stalls shall be outfitted with level 2 electric vehicle charging stations.
- (2) Drive isle width shall be a minimum of 6.2 m.
- (3) The parking area shall have an access to a public thoroughfare and the access shall be configured so that its width is not less than 5.0 m and not more than 10.0 m.
- (4) Where a *parking space* or maneuvering isle abuts a wall or *building*, the width of the *parking space* or maneuvering aisle as determined by Schedule 7B shall be increased by an additional 0.4 m.

8.64.10 Bicycle Parking Spaces

Notwithstanding the requirements of Division 7 of this bylaw, bicycle *parking spaces* shall be provided and maintained as detailed below:

- (1) 108 secure bicycle *parking spaces* located in either a *dwelling unit* or a secure room within the *apartment building*.
- (2) 16 secure, oversized bicycle *parking spaces* located at grade and within a separate, enclosed bicycle parking room, 2 of which are intended for visitor parking.
- (3) 40 bicycle *parking spaces* intended for visitors located at grade, illuminated and in a manner which a bicycle can be securely locked to a fixed rack.

8.64.11 Landscaping and Screening

Notwithstanding the Landscape Requirements identified elsewhere in this bylaw, the following landscape requirements shall be met:

- (1) A landscape buffer of at least 4.5 m shall be provided along the southeast property line, whereas no hardscaping or *structures* are permitted.
- (2) A landscape buffer of at least 1.0 m shall be provided along the northwest property line, except where a stairwell exists.
- (3) A continuous buffer of vegetated screening at least 3 m high shall be maintained along the property's frontage.

- (4) Loading areas, garbage and recycling containers shall be screened and gated to a minimum of 2.0 m by a *landscaping* screen or a solid decorative *fence* or a combination thereof.

Part 65 - Comprehensive Development Forty-Three Zone (CD-43) - 925 Braidwood Road

8.65.1 Intent

The CD-43 Zone is intended to accommodate a *purpose-built shelter*, community services and *offices, supportive housing* and *non-market housing* on the property legally described as Lot 8, Section 16, Comox District, Plan 6065, except part in plan 1149RW (925 Braidwood Road). This property shall be developed in accordance with Schedule A, which forms part of this zone and which shows the general layout intended for this zone.

8.65.2 Permitted uses

The following uses are permitted and all other uses are prohibited except as otherwise noted in this bylaw:

Primary Uses

- (1) *Purpose-built shelter*
- (2) *Supportive housing*
- (3) *Non-market housing*

Secondary Uses

- (1) *Community service*
- (2) *Office*
- (3) *Accessory buildings and structures*

8.65.3 Lot Coverage

The maximum *lot coverage* for *buildings, structures* and *impermeable surfaces* is 60%.

8.65.4 Floor Area Ratio

The maximum *floor area ratio* shall not exceed 1.4.

8.65.5 Minimum Lot Size

A *lot* shall have an area of not less than 12,000.0 m²

8.65.6 Minimum Lot Frontage

A *lot* shall have a frontage of not less than 20.0 m.

8.65.7 Setbacks

Except where otherwise specified in the bylaw the following minimum *building setbacks* shall apply:

- (1) *Front yard:* 6.0 m.

- (2) *Rear yard:* 5.0 m.
- (3) *Side yard:* 4.5 m.

8.65.8 Height of Building

The *height* of a *building* shall not exceed 21.0 m.

8.65.9 Useable Open Space

Useable open space shall be provided on a *lot* in the amount of 20.0 m² per *dwelling unit* in a *multi-residential dwelling*. For clarity, this requirement does not apply to a *purpose-built shelter* or *supportive housing*.

8.65.10 Accessory Buildings and Accessory Structures

- (1) Shall not exceed 4.5 m in *height*
- (2) Shall have a total *building area* not exceeding 100.0 m²
- (3) Shall be permitted in the side provided they shall conform to all relevant siting regulations of this bylaw
- (4) Shall not be located within 3.0 m from the side and *rear lot line* except where the side or *rear yard* flanks a *street*, excluding a *lane*, in which case the minimum *yard* distance shall be 4.5 m and whereas *retaining walls* are excluded from these siting requirements.

8.65.11 Off-Street Parking and Loading

Off-street parking shall be provided and maintained in accordance with the requirements of Division 7 of this bylaw except:

- (1) For a *purpose-built shelter*, 0.15 vehicle parking stalls shall be provided per shelter bed;
- (2) For *supportive housing*, 0.2 vehicle parking stalls shall be provided per *supportive housing* unit; and
- (3) For *non-market housing*, 1 vehicle parking stall shall be provided per *dwelling unit*, with 10% of the required spaces being provided and retained for visitor parking.

8.65.12 Bicycle Parking Spaces

Notwithstanding the requirements of Division 7 of this bylaw, bicycle parking shall be provided and maintained as detailed below:

- (1) *Purpose-built shelter:* 0.5 secure bicycle lockers per shelter bed
- (2) *Supportive housing:* 0.5 secure bicycle locker per *supportive housing* unit
- (3) *Non-market housing:*
 - (i) 1 secure bicycle *parking spaces* for each *studio* unit
 - (ii) 2 secure bicycle *parking spaces* for each 1-bed unit
 - (iii) 4 secure bicycle *parking spaces* for each 2 or more-bedroom unit

- (iv) All bicycle *parking spaces* provided for the use of residents shall be completely enclosed within the principal or an *accessory building* and must be independently accessible from a rack securely anchored to the ground or wall.
- (v) 10% of minimum required bicycle *parking spaces* shall be designed for oversized bicycle *parking spaces* with the following minimum dimensions: 3.0 m (length) by 0.9 m (width) by 2.1 m (height).
- (vi) In addition to resident bicycle parking, the number of visitor bicycle parking stalls that must be provided is calculated as 10% of number of resident bicycle *parking spaces* required.

8.65.13 Landscaping and Screening

- (1) *Landscaping* and screening should be guided by Crime Prevention Through Environmental Design (CPTED) principals and where required variations to *landscaping* requirements may be accepted, if the variation is supported by CPTED principals.
- (2) A landscaped screen, *fence* or a combination thereof of not less than 2.0 m of height shall be provided on the side property lines.
- (3) A landscaped screen, *fence* or a combination thereof of not less than 1.2 m of height and shall be provided on the front and rear property lines.
- (4) A minimum 1.5 m wide illuminated public pedestrian access connecting Braidwood Road and Ryan Road sidewalk shall be provided through the site.
- (5) Loading areas, garbage and recycling containers shall be screened and gated to a minimum height of 2.0 m by and *landscaping* screen or solid decorative *fence* or a combination thereof.

DIVISION 9

TEMPORARY USE PERMIT

Justification

In accordance with the *Local Government Act*, Part 14, Division 8, the Zoning Bylaw allows a *municipality* to designate areas where temporary uses may be allowed and specify general conditions regarding the issuance of Temporary Use Permit in the areas.

Objective

A Temporary Use Permit allows for flexible use of land, on a temporary basis, not otherwise permitted in the Zoning Bylaw. *Council* may, by resolution, issue a Temporary Use Permit and specify the conditions under which the temporary use be carried on such as addressing potential negative effects on existing *residences*, businesses, or other surrounding properties in terms of noise, lighting, parking, traffic, or other adverse impacts.

All Temporary Use Permits must conform to policy direction in the OCP, including fit within the character of the neighbourhood and surrounding uses. Upon expiry of a Temporary Use Permit, the *permitted uses* revert to those outlined in the Zoning Bylaw.

Policies

- (1) All zones in the *City* are designated a Temporary Use Permit area.
- (2) The applicant must include the following relevant information at the time of the permit application:
 - (i) Duration of the proposed temporary use including assurance that the use is temporary or seasonal in nature;
 - (ii) Map indicating the existing and surrounding land use;
 - (iii) Plan of the *buildings* or *structures* that may be used;
 - (iv) Potential conflict with residential land uses;
 - (v) Potential impacts on Environmentally Sensitive Areas;
 - (vi) Provision of adequate servicing that meets *City* requirements; and
 - (vii) Site rehabilitation plan.
- (3) TUPs may be issued for a period up to three (3) years, but generally shall be a maximum of two (2) years, and may be renewed once, subject to *Council* approval.
- (4) Conditions under which a temporary use may be allowed are established in the permit and may include, but not be limited to: location, site design and layout, screening, *landscaping*, demolition, site restoration, and length of time the temporary use can occur.
- (5) Security deposits may be required and included in the permit condition to ensure all the conditions are met and the subject land is properly rehabilitated upon cessation of the use.

DIVISION 10 DEVELOPMENT PERMIT AREAS

Schedule 8 – Development Permit Areas

DEVELOPMENT PERMIT AREAS GUIDELINES

This document contains the specific guidelines to be followed when development applicants are required to obtain a Development Permit. The Development Permit Area designations, including objectives, for all Development Permit Areas within the City of Courtenay are also contained within the draft Official Community Plan (OCP). The guidelines in this document will be added to the City of Courtenay Zoning Bylaw upon adoption of the Official Community Plan.

DEVELOPMENT PERMIT AREA DESIGNATIONS

Introduction and Context

Development Permit Areas (DPAs) offer an implementation-oriented framework to ensure that development decisions support the community's broader aspirations as articulated in the Official Community Plan (OCP) within the authorities granted by the Local Government Act (LGA).

DPAs fit within a broader land use policy context and hierarchy:

OCP

- **Land Use Designations** – Reflecting long-term community goals and ambitions, the OCP guides overall City growth by designating land uses according to area of intended activity.

- **Zoning** – Regulated according to the Zoning Bylaw, specifics of scale and type of development in each land use zone outline permitted uses, densities, heights, setbacks, etc.

Zoning Bylaw

- **Development Permit Areas** – These focused tools then guide form and character, access, environmental protection measures, and a variety of other characteristics for development within each development permit area and specific land uses.

Division 7, Section 488 (1) of the LGA allows OCPs to designate DPAs for a variety of purposes, and allows for specific

design objectives to be achieved, making sure development is responsive to its context. DPAs may be designated for the purposes of:

- Protection of:
 - a) The natural environment, its ecosystems, and biological diversity
 - b) Development from hazardous conditions
 - c) Farming
- Establishment of objectives for the form and character of:
 - d) Revitalization of an area in which a commercial use is permitted
 - e) Intensive residential development
 - f) Commercial, industrial, or multi-residential development
 - g) In relation to an area in a resort region, establishment of objectives for the form and character of development in the resort region
- Promotion of:
 - h) Energy conservation
 - i) Water conservation
 - j) Reduction of greenhouse gas emissions

With the exception of g) (resort region), all designations are contained within the Courtenay DPAs as described further in each DPA category. The Development Permit Areas are designated within the OCP and the implementation-oriented guidelines are contained within the Zoning Bylaw.

DPA Categories

Five Development Permit Areas are designated, the objectives for which and lands to which they apply are described further in the following pages. All of the City of Courtenay is a Development Permit Area but only the following listed uses, lands, or specific areas are subject to Development Permits:

Table 1 Development Permit Area Categories

DPA Category	Purpose
1. Commercial, industrial, large-scale residential and mixed-use.	Form and character guidelines contained within the Zoning Bylaw communicate urban design expectations, including for the purposes of intensive residential and multi-residential development, commercial revitalization, energy and water conservation, greenhouse gas emissions reductions, and protection of the natural environment. These guidelines support design decisions that are responsive to context and climate and offer the flexibility to respond creatively while ensuring cohesive and thoughtful planning and design of new development.
2. Small-Scale Multi-Unit Residential.	
3. Farm Protection.	Farm protection guidelines contained within the Zoning Bylaw communicate setback, siting, separation and screening requirements when developing adjacent to agricultural lands in order to minimize the potential for conflicts between agricultural and non-agricultural land uses.
4. Environmental.	Environmental and hazardous guidelines contained within the Zoning Bylaw communicate environmental protection and development safety considerations when conducting any form of development near Environmentally Sensitive Areas (ESA) or Steep Slopes.
5. Protection from hazardous conditions: Steep Slopes.	

In general, where land is within a DPA, an owner must obtain a development permit prior to:

- Subdivision;
- Construction of, addition to, or alteration of a building or structure, land, or parking area;
- Alteration of land containing or adjacent to an Environmentally Sensitive Area (ESA).

A number of general exemptions are listed here. More specific exemptions are included within the Development Permit Area guidelines provided within the Zoning Bylaw.

Exemptions for Normal Farm Practices

Normal farm practices in accordance with the Farm Practices Protection (Right to Farm) Act do not require a development permit.

Exemptions for Environmental Development Permits

Environmental Development Permits are not required:

- For the replacement of windows;
- For painting the exterior of a building;
- Institutional uses; or
- For any of the activities or circumstances defined within the Exemptions section of the Environmental DPA Guidelines.

Exemptions for Form & Character Development Permits

A Form and Character Development Permit is not required if any of the following are the case, including if multiple exemptions are the case:

- Institutional uses;
- Replacement of windows;
- Painting the exterior of a building;
- Construction of a fence;
- Replacement of a roof;
- Accessory buildings that do not require a building permit;
- Proposed residential development with a total of one or two dwelling units;
- For a minor alteration to the exterior of a building that does not change the architectural character of the development. For the purpose of this Section, "minor" is defined as a change which does not:
 - a. Increase site coverage more than 25% of the approved coverage;
 - b. Alter more than 25% of the existing floor area to a maximum of 200 m²;
 - c. Change the exterior design of a building on any one side more than 25%, including the addition or removal of windows.
- Where a subdivision or strata plan including a phased strata plan is consistent with a Development Permit issued for a development on a property.

HOW TO USE THESE GUIDELINES

Multiple DPAs

Depending on the project, multiple DPA categories may apply. In cases where an application is subject to more than one DPA category, only one Development Permit will be issued; however, the application will be subject to meeting the guidelines of all applicable DPAs.

General & Additional Guidelines

The guidelines for each of the DPAs have been organized to include both general guidelines that apply to any type of development within that category of DPA, as well as additional guidelines that apply only to specific uses, areas, or circumstances.

DPA Section Organization

Within each DPA category, content is organized as follows:

- **Justification** - The designation of the specific use or area, including maps where relevant, as defined by Section 488 (1) of the Local Government Act
- **Objectives** - The rationale for the category and what the guidelines aim to achieve
- **Guidelines** - The instructions within a particular category, outlining topics such as:
 - Siting, Scale & Massing
 - Architectural Detail & Materials
 - Open Space & Amenity Areas
 - Landscaping & Screening
 - Universal Design & Accessibility
 - Site Circulation, Parking & Servicing
 - Environmental Protection & Restoration
- **DPA specific exemptions** - For some DPAs, specific exemptions apply.

LANGUAGE OF GUIDELINES

The guideline sections provide a variety of measures. Some of these measures are of high importance, while others seek to guide thinking to permit flexibility in achieving outcomes.

In order to recognize this sliding scale of emphasis, language has been crafted to include verbs and adverbs that direct users on intended outcomes:

- **'Shall' / 'Must' / 'Required'** - Identifies the measure as a requirement.
- **'Shall Not' / 'Must Not' / 'Prohibited'** - Identifies the item as not allowed.
- **'Should' / 'Recommended' / 'Encouraged'** - Identifies the measure as having a strong preference, with its inclusion to be explored or an alternative approach to be justifiable / reasonable.
- **'Should Not' / 'Not Recommended' / 'Discouraged'** - Similar to above, this reflects a negative preference for the measure in question, and unless a well-reasoned justification is provided is not to be included.
- **'May' / 'Could'** - These items are optional, and will be suitable based on individual contexts.

DPA-1: COMMERCIAL, INDUSTRIAL, LARGE-SCALE RESIDENTIAL AND MIXED USE

JUSTIFICATION:

This Development Permit Area is intended to achieve attractive, architecturally coordinated and context appropriate higher density, employment and mixed-use building and landscape designs that consider the relationship between buildings, open areas, and circulation systems, in order to promote walkable, safe, and vibrant developments. It also promotes development that considers protection of the natural environment, energy efficiency, water conservation and the reduction of greenhouse gas emissions.

Pursuant to Section 488(1)(a)(d)(f)(h)(i) and (j) of the *Local Government Act*, this designation applies to all developments that contain commercial, industrial or mixed-uses and residential developments with five or more residential units within the boundaries of the City of Courtenay. Additional guidelines apply for a defined area of the downtown (as shown on enclosed Map 1) as well as in special heritage consideration areas (as shown on enclosed Map 2 - Old Orchard & Terminal Addition).

Objectives:

1. To ensure urban infill and redevelopment is well integrated and context-sensitive.
2. To promote compact urban form that is well-connected and accessible by walking, cycling, and transit and supportive of transit supportive densities.
3. To promote the creation of new destinations that help meet residents' daily needs by short walkable trips to grocers, shops, restaurants, personal services, community centres, and gathering spaces.
4. To transform vehicle-centric developments and prioritize the pedestrian environment.
5. To ensure attractive streetscapes, landscapes, building design, and vibrant public spaces.

Map 1 Downtown Development Permit Area

- 6. To foster neighbourhood connections and a shared sense of community across the city.
- 7. To improve urban ecological functions such as local biodiversity and rainwater infiltration.
- 8. To reduce energy and water consumption as well as greenhouse gas emissions (GHGs) associated with the built environment.

Within the Downtown Core (Map 1):

- 9. To protect and enhance the historic, small-scale retail character of the 4th, 5th, 6th Streets streetscape.

On Lands with a Multi-Residential Component:

- 10. To support a greater diversity of housing choices and affordability.
- 11. To ensure a high standard of livability and well-being within multi-residential developments.

On Lands with a Commercial and/or Industrial Component:

- 12. To enable the flexible and appropriate adaptive use and design of industrial lands to meet evolving community needs.
- 13. To provide convenient and safe access to industrial areas via all modes of transportation, including commercial or personal vehicles, transit, walking, and cycling.

Within the Old Orchard and Terminal Addition Neighbourhoods (Map 2):

- 14. To ensure new development contributes to the community and preservation of heritage resources and special neighbourhood character of the Old Orchard and Terminal Addition neighbourhoods.

GENERAL GUIDELINES

Siting, Scale & Massing

1. Passive design strategies that take advantage of site-specific climatic conditions shall be employed wherever possible depending on site characteristics. For siting considerations, this includes:
2. Buildings should be oriented to take maximum advantage of site-specific climatic conditions, especially solar access and wind flow.
3. Windows should be strategically designed, sized, and placed to manage year-round passive solar gain, while maximizing privacy where relevant (e.g. multi-residential uses).
4. Access to operable windows should be provided on at least two sides of the building to enable passive cooling through cross ventilation.
5. Roof overhangs, fixed fins, awnings, or other solar shading devices should be incorporated on south-facing windows to provide shade from peak summer sun while also enabling sunlight penetration during winter months.
6. All buildings, structures and expansions or additions thereto, shall be architecturally coordinated.
7. Where multiple buildings are proposed on one site, each building should be distinct, but designed to achieve cohesive scale, massing, and proportion.
8. The scale, form, height, setback, roofline, materials, and character of new development should complement neighbouring developments.
9. Massing should frame spaces, and create environments suitable to the location and use in which they are located.
10. Buildings should be sited to define the public realm with a continuous street wall. The building's primary façade should be facing the street and close to the minimum setback to establish a well-defined street edge.
11. Buildings should maintain and enhance existing views to surrounding natural features, particularly from sidewalks, streets, and public open spaces; and the design shall protect or mitigate impacts to identified public realm view corridors, including Comox Glacier, Courtenay, Puntledge, and Tsolum Rivers, K'ómoks Estuary, Salish Sea.
12. Stepped or varied building massing, articulated building walls and rooflines shall be incorporated to develop building form and character.
13. Buildings located on corner lots, lots adjacent to a residential property, and lots next to public open spaces should be stepped down toward the flanking street, adjacent building, or public open space.
14. Flat roofs should be structurally and architecturally designed to accommodate forms of rooftop landscaping and accessible outdoor amenity space.
15. Building frontages should be articulated and visually separated into smaller, distinctive units.

16. All street and public open space facing façades shall be activated with a diversity of visual elements and shall relate to the pedestrian scale. This may include the use of detailing of the façade, ground floor glazing, window size, awnings roof canopies, landscape treatment, distinct materiality, and building articulation.

17. Entries should be located or appear to front on to the street.

18. All exterior mechanical and electrical equipment shall be strategically located and incorporated into the overall architectural treatment in order to reduce visual impact. Equipment shall be located away from sidewalks and pedestrian amenities and screened from view or screened to blend in with the roof and/or elevator housing.

Example of stepped building massing and articulated walls to develop building form and character (guideline 12).

Example of stepped and varied rooflines to develop building form and character (guideline 12).

Example of articulated building frontages that are visually separated into smaller distinctive units, at both the ground and upper floors (guideline 15).

Example of a diversity of pedestrian-scaled visual elements being incorporated into the street-facing building façade (guideline 16). In this case a number of distinct building entries are incorporated.

Architectural Detail & Materials

19. The design of buildings should reflect the surrounding character.
20. The architectural design and building materials shall be of a high standard that indicates energy efficiency, quality, stability, and permanence.
21. Simple shifts in massing and changes in exterior colours and textures should be utilized to articulate façades.
22. Materials such as stone, ornamental work, and wood with varied details and columns shall be included.
23. Buildings should promote an emerging west coast character that prioritizes the use of natural materials such as exposed mass timber structural elements, vegetation, and natural light.
24. Any wall of a building which is visible from an open space (including a street), or residence shall be finished to the same standard as the front of the building to provide an attractive appearance.
25. Awnings, lighting fixtures and other structures shall be architecturally integrated with the design of the buildings.
26. Large expanses of blank walls or of any one material are not acceptable without architectural detailing, artwork, or sufficient landscaping to create visual interest.
27. Building roofs shall be designed to minimize the heat island effect and heat transfer into the building through various measures, including Energy Star-rated or high-albedo colour and materials. See additional green roof guidelines for Additional Guidelines for Part 3 Buildings.
28. Insulation and glazing shall include the following design treatments wherever possible:
 - a. Maximum insulation effectiveness of the assembled building envelope to reduce heat loss.
 - b. High-performance glazing.
 - c. Punched or slightly recessed glazing on south- and west-facing elevations to reduce heat gain in summer.
 - d. Thermally broken window frames and concrete balcony slabs.
 - e. Bird-friendly glazing – The critical zone for bird collision is within a building’s first four storeys, or mature tree height, whichever is greater. Use visual markers on the external surfaces of glass that are no more than 50mm wide and 100mm high within the critical zone. Possible visual markers include UV markers, fenestration patterns, adhesives, etching, fritting, sunshades, louvers, screens, blinds, and netting.

Example of bird-friendly glazing (guideline 28). The pattern shown is etched directly on lower-floor windows to reduce the frequency of bird collisions.

Example of emerging west coast character of wood, including tree timbers, being incorporated into a parking structure (guideline 23).

Example of use of ornamental wood, wood with varied details (guideline 22); emerging west coast character (guideline 23); and downtown heritage aesthetic (guideline 103).

Example of an industrial building incorporating changes in exterior colours and textures (guideline 21); and wood with varied details and columns (guideline 22).

Examples of different forms of artistic treatments and landscaping to create visual interest along large expanses of unavoidable blank walls (guideline 26).

Public Realm & Streetscape

29. Streetscapes and other public realms shall include a balance of vegetated, naturalized areas with permeable hardscapes.
30. Public realms shall maximize solar access. Optimal locations may include internal courtyards, rooftops, and ground floor plazas or park spaces adjacent to the property.
31. Distinct paved surfaces and street furnishings such as benches, lamps, bike racks, and refuse containers shall be incorporated in the landscape design. These shall be consistent in character to the development.

Example of a street-facing business providing a balance of naturalized areas and hardscapes (guideline 29).

Universal Design, Safety & Accessibility

32. Universal design and accessibility principles shall be designed into plazas, mid-block connections and lanes, through the appropriate selection of materials, stairs, and ramps as necessary, and the provision of wayfinding and lighting elements.
33. Ground floor units of residential buildings shall be accessible with a ramp or otherwise have no step entrances/ be level with the adjacent ground. Entrances should provide sufficient room for maneuvering wheelchairs and strollers, with a minimum turning radius of 1,500mm.
34. Streets should include frequent seating, with opportunities to sit every 50 metres.
35. On-site wayfinding strategies shall be employed that create attractive and appropriate signage using a 'suite' of similar elements that are consistent and accessible. Signage strategy shall include the needs of pedestrians, cyclists, and motorists, where applicable, and shall provide directional signage to public washrooms (in commercial and retail areas) as well as elevators. Washroom signage shall specify the location of family washrooms with change tables and accessible washrooms.
36. Lighting should be designed for security and safety. However, there should not be glare on neighbouring properties, adjacent roads, environmentally sensitive areas, or the sky.
37. All new, replacement, and upgraded street lighting in existing and proposed developments shall be LED Full-Cut Off/ Flat Lens (FCO/FL) luminaries to light roads, parking, loading and pedestrian areas. Exterior building lighting will also be required to have FCO lighting fixtures.
38. Bird-Friendly lighting – Building-mounted lighting should be targeted and shielded to reduce light spill and its associated light pollution. Downlights are preferred, as is the use of green or blue light over white or red light.

Example of lighting treatments designed to avoid glare to adjacent properties and the street from both the private and public realm (guideline 36).

Landscaping & Screening

39. Existing, native vegetation within the Development Permit Area shall be retained as much as possible to minimize disruption to habitat and to protect against erosion and slope failure where applicable.
40. A Tree Density Target of 50 trees per hectare shall inform the minimum tree retention and/or planting requirement as part of a landscape plan, per Tree Protection and Management Bylaw 2850.
41. On-site landscaping to promote opportunities for passive heating/cooling without negatively affecting the potential for solar thermal or solar electric systems on the site and on surrounding properties shall be considered. For example, deciduous trees can provide desirable shading in the summer and allow for desirable solar gains in the winter.
42. Landscape strategies shall include opportunities to naturally convey, capture, treat, and infiltrate rainwater wherever possible. This includes maximizing pervious surfaces on the site using permeable unit paving assemblies, grasscrete, permeable concrete, rain gardens, bioswales, bioretention cells, bioretention planters, and bioretention corner bulges, rainwater tree trenches (soil cells and structural soil), and green roofs.
43. Landscaping shall be incorporated within all setback areas and shall be distributed throughout the site.
44. All fronting public boulevard areas shall be landscaped, with trees, and consistent with the onsite landscaping plans.
45. Parking and outdoor storage shall not be located along required building setbacks and landscape areas along street frontages.
46. Most or all of the landscaped areas should be designed to require little to no irrigation, other than hand watering for initial plant species establishment.
47. If irrigation is supplied, it should be limited to an underground system designed with high-efficiency targeted drip heads and automated weather sensors and use captured rainwater and greywater where possible.
48. All proposed planting zones should prioritize the selection of local plants that provide habitat, nesting, pollinator, foraging, or other biodiversity benefits and are drought tolerant.

- a. Species adapted to future climate conditions shall be incorporated to the maximum extent possible.
- b. Plantings should be provided in strategic locations to frame building entrances, soften edges, screen parking areas, and break up long façades.
- c. Multi-functional landscape elements should be provided wherever possible, such as planting areas that also capture and filter rainwater or landscape features that feature public art or that users can interact with.
- d. In residential environments, and outside of Environmentally Sensitive Areas, tree and plant selection should prioritize edible species and active urban agricultural uses should be included.

49. Foundation landscaping along the face of buildings is encouraged.

50. Decorative fences shall be architecturally coordinated with the materials used for the principal building.

51. Chain link fencing shall not be used in the front yard and when facing streets and public open spaces, unless effectively screened by landscaping.

52. Sufficient soil volumes shall be provided to support mature vegetation, including trees where applicable. This may include supplementing soil volumes with structural soil or silva cell type systems within hardscape areas.

Minimum depth of topsoil or amended organic soils must be provided:

- a. Shrubs - 450mm
- b. Ground cover and grass - 300mm
- c. Trees - 300mm around and below the root ball, typically to a minimum total of 900mm. In addition, 15m³ is the minimum soil volume per tree, to be supplemented in hardscape zones with structural soil or silva cell type systems.

53. Topsoil or composted waste shall be used to assist in infiltration and increase the water holding capacity of landscaped areas.

Example of existing mature native vegetation being retained in a multi-residential development as part of the overall landscape concept (guideline 39).

Example of rainwater management features being integrated into landscape design (guideline 42).

Example of fronting public boulevards being landscaped and integrated into the site's landscape design (guideline 44).

Definitions for different types of outdoor spaces:

Private: Zones or areas for the use of the private property owner or designated group. This includes a private balcony, deck, or yard.

Semi-Private: Zones that are privately owned, but generally facilitate larger gatherings, such as common amenity spaces. These spaces are still generally for a designated group, with limited access to the wider public.

Semi-Public: Zones that allow access to the wider public, either to occupy or pass through. Common examples include seating areas or patios, right-of-ways across private developments, or parkettes provided by private development as public amenities.

Public: Zones that are fully accessible to the wide public, with an open sense of ownership. These are often city owned, and include areas like parks, plazas, and trail networks.

Site Circulation, Parking, and Servicing

54. Drive-through facilities are not permitted.
55. A pedestrian network shall be incorporated into the overall site design to ensure seamless and safe connections between the building(s) and parking areas and to logical destinations off-site.
56. Large lots should include mid-block connections—exterior public pedestrian routes that provide a connection or short-cut through blocks—in order to break down the scale of longer blocks and to create finer-grained connections to open space and active transportation networks.
57. Sidewalks shall be provided along the full length of the building along any façade featuring a customer entrance, and along any façade abutting a parking area. Landscaping is encouraged as part of the design of the sidewalk.
58. The internal pedestrian network shall be distinguished from driving surfaces using durable, low-maintenance surface materials such as pavers, bricks, or concrete to enhance pedestrian safety and comfort, as well as the attractiveness of the walkways.
59. Continuous weather protection shall be provided along exterior building walls directly adjacent to pedestrian networks and areas.
60. Off-street parking and loading spaces between the front façade of a building and the fronting street shall be avoided unless screened with significant landscaping. The preferred location of main parking and loading areas is at the rear and/or side of the building.
61. Parking areas should be broken down into smaller parking areas evenly dispersed throughout the development integrated with planted landscape areas.
62. Service and access points should prioritize pedestrian use wherever they cross walkways or the public realm.
63. Parking areas, drive-through lanes, utilities, and storage areas shall be screened from adjacent properties and from direct views from the street and other public open spaces.
64. Garbage and recycling containers shall be adequately sized to ensure maximum waste diversion opportunities on site.
65. Garbage and recycling containers shall be screened with landscaping and fencing and gated to a minimum height of 2 metres by buildings, a landscaping screen, solid decorative fence, or a combination thereof. Similarly, utilities, service kiosks, meters, elevator housing, exhaust elements, satellite dishes, etc., shall be screened with landscaping and fencing.
66. Sheltered, secure bicycle parking facilities shall be provided at grade near primary building entrances and pedestrian walkways.
67. Opportunities for priority car sharing and bicycle sharing parking are encouraged.
68. Electric bike parking and Electric Vehicle charging stations shall be planned and installed in convenient land accessible locations.
69. End of trip cycling facilities (e.g. washrooms, showers, lockers) are encouraged for larger developments and as part of Transportation Demand Management strategies.

Example of an animated mid-block connection at a pedestrian scale to improve pedestrian connectivity and create opportunities for additional outdoor public space (guideline 56).

Example of a continuous weather protection option, such as along exterior building walls directly adjacent to pedestrian networks and areas (guideline 59).

Example of using exposed mass timber structural elements as part of an emerging west coast character (guideline 23). Also includes pedestrian and cycling supportive features such as private sidewalks along the length of the building entry (guideline 57); weather protection (guideline 59); and seating and bike parking (guideline 31).

ADDITIONAL GUIDELINES FOR MULTI-RESIDENTIAL USES

The following guidelines apply to any multi-unit residential development of three or more units and any mixed-use development that includes a residential component.

70. For multi-unit residential buildings, individual units shall be articulated through integration of recessed entries, balconies, materials, or projection/recess in the façade.
71. Noise impacts of highways or arterial roads upon outdoor private and semi-private areas, and interior living spaces, should be mitigated through building and site design.
72. Buildings shall be sited to ensure the privacy of residences and adjoining properties.
73. Where individual unit heat pumps are used, they shall be screened. Ducted heat pump systems are recommended wherever possible.
74. Sufficient space for waste diversion receptacles shall be provided within each dwelling unit (e.g. space under the sink or a closet for a recycling bin, compost bin, and garbage bin).
75. Personal storage space for larger items shall be provided for each dwelling unit, whether it be within the dwelling unit or within a secured and convenient location within the development.

Private & Common Amenity Space

76. A minimum average of 20 m² of usable private outdoor spaces should be provided for each dwelling unit in the form of a deck, patio or yard, exclusive of common amenity areas.

77. A minimum of 10% of the total site area should be dedicated to common amenity spaces, whether indoor or outdoor. The common amenity space shall include sufficient area to allow for larger gatherings.
 - a. Common outdoor amenity spaces should incorporate landscaping, seating, communal tables, play spaces, public art, and other elements that encourage gathering, recreation, and inter-generational activities and uses.
 - b. Common outdoor amenity spaces to grow food is strongly encouraged. Where provided, gardening areas shall be designed to be functional for routine and active gardening by multiple residents and include servicing and accessibility requirements. Gardening areas are encouraged to be designed with other amenities, including outdoor children's play areas, indoor amenity rooms with kitchens, washrooms, and eating areas, and/or outdoor seating areas.
 - c. All units shall be designed to have easy access to the usable private outdoor or common amenity spaces. Where applicable, they shall be separated from traffic and parking or include traffic calming, pedestrian-supported measures.
78. Outdoor spaces should be located to maximize sunlight penetration, minimize noise disruptions, and minimize 'overlook' from adjacent units.
79. Outdoor semi-private spaces are encouraged to be integrated with public open areas to create seamless, contiguous spaces.

80. Outdoor spaces and landscaped areas shall be designed to protect and feature mature trees on site, where possible. Where mature trees cannot be protected or where no mature trees exist on site, adequate open space shall be provided to ensure shade trees reach mature sizes.

Circulation & Parking

81. Buildings shall be clustered and roads minimized, where possible.

82. Where individual multi-residential units have vehicular access via a public street, combined driveway access points are required.

83. Where multi-residential units have individual garages or carports, they shall face away from streets.

84. Where lane access is available, parking entrances should be limited to lane access.

Specific to Townhouses

85. Where townhouse units are provided:

- a. Avoid symmetrical units and mirror image residential units unless each unit has a significant amount of fenestration and architectural detail.
- b. Individual entrances should front on to the street or public open space, where applicable.
- c. The building façade along street or public open space frontages shall be set back from the property line and sufficiently landscaped to create a transition zone from public land to private individual units.

Example of a multi-residential building that has minimized the visual impact of parking by combining driveways (guideline 82) and facing garages away from the street (guideline 83).

Example of a townhouse development façade setback and landscaped to create a transition zone from public land to individual units (guideline 85 c).

Example of a townhouse development in which mirrored units are sufficiently distinct through the use of fenestration and significant architectural detail (guideline 85 a).

Example of a central common outdoor amenity space (guideline 77), with easy pedestrian access to individual units, where possible (guideline 77 c).

Example of a rooftop common amenity space that includes both indoor and outdoor opportunities (guideline 77).

Example of private outdoor space provided for a residential unit within a mixed-used development (guideline 76).

ADDITIONAL GUIDELINES FOR COMMERCIAL USES

86. Buildings shall be designed with active frontages that include multiple, smaller storefronts, each defined by distinct signage, entrances, canopies and/or materiality. Frequent entrances and display windows shall be included to provide consistent architectural rhythm of smaller intervals.
87. Large-format retail uses should be wrapped with smaller retail units around the periphery, with individual entries accessed from the fronting sidewalk or open space.
88. Commercial, ground-level business premises should be provided continuously along pedestrian-oriented shopping areas.
89. First-floor commercial spaces should have a higher floor-to-ceiling height than upper floors.
90. Semi-public open spaces are strongly encouraged in the front of buildings. These may include:
 - a. narrow extensions of the public sidewalk, or more generous amenity plaza or courtyard areas.
 - b. setbacks for one or more adjacent buildings to collectively form a continuous open space along the street.
 - c. plantings, trees, lighting.

Example of a semi-public courtyard shared amongst a number of businesses (guideline 90).

Example of a modest semi-public commercial space along a building façade that provides for visual interest (guideline 90).

Example of commercial buildings designed with active frontages that include multiple and distinct smaller storefronts (guideline 86).

ADDITIONAL GUIDELINES FOR PART 3 BUILDINGS

- 91. Opportunities for the distribution of natural daylight into a building’s interior spaces to reduce the requirement for electric lighting use should be incorporated. Avoid the use of heavily tinted or reflective glazing that reduces the penetration of daylight and increases exterior glare.
- 92. Where possible, greater floor-to-ceiling heights should be included to increase the amount of interior space that can be day-lit from windows and to allow for vertical air ventilation, particularly for units with exterior walls on only one side.
- 93. Roofs or roof structures of buildings should be oriented within 15 degrees of due south to optimize solar energy collection through the use of solar thermal and photovoltaic (PV) modules.
- 94. A minimum of 10% of building electricity demand shall be provided by a combination of solar thermal or solar photovoltaic (PV) technologies. Solar PV installations can include both roof- or wall-mounted arrays or cladding systems.
- 95. New Part 3 buildings shall have at least partial green roof coverage, according to the table at top-right. Available roof space is defined as the total roof area minus areas dedicated to renewable energy infrastructure. Where feasible, prioritize intensive green roofs that enable active uses.

Gross Floor Area (Size of Building)	Coverage of Available Roof Space (Size of Green Roof)
2,000–4,999 m ²	20%
5,000–9,999 m ²	30%
10,000–14,999 m ²	40%
15,000–19,999 m ²	50%
20,000 m ² or greater	60%

Example of solar photovoltaic panels being incorporated with greenroof elements (guideline 94 and 95).

Example of a Part 3 building with green roof coverage (guideline 95).

ADDITIONAL GUIDELINES FOR INDUSTRIAL USES

96. Acute noise sources shall be located as far from residential uses as possible.
97. Any office, reception, or sales component of the building shall be located closer to the street than any active industrial components.
98. A continuous perimeter of landscaped area of minimum 4.5 metres in width shall be provided along the inside of all property lines adjacent to streets, public open spaces, and residential uses.

ADDITIONAL GUIDELINES FOR CORNER LOTS

99. Buildings on corner lots should orient frontages towards both streets and/or towards the corner and may include a corner-cut. Corner buildings should serve as anchors for the rest of the block, and consider including landmark architectural features such as:
 - a. Public plazas
 - b. Special or decorative canopies
 - c. Bay windows, balconies, turrets, or articulated roof line features
 - d. A corner entrance
 - e. A prominent public art element

Example of a building on a corner lot designed to be visually interesting, including with a corner-cut, to provide a positive presence on both fronting streets (guideline 99).

ADDITIONAL GUIDELINES FOR DOWNTOWN *(See Map 1)*

- 100. Design shall respond positively to the scale and character of the downtown area and contribute to the evolution of the downtown’s public realm.
- 101. Building frontages shall contribute to the character of a continuous commercial street wall.
- 102. Storefronts are encouraged to front on to Duncan Avenue to support the future development of Duncan Mews and Commons public realm concept.
- 103. The incorporation of a heritage aesthetic or heritage elements is encouraged through the use of architectural style and materials.
- 104. The development of rear laneways and alleyways for active use is strongly encouraged. Rear building façades should be designed to accommodate active commercial or retail space where appropriate.
- 105. Laneway design should include the use of materials, walls, fences, lighting, and landscape treatments that are inviting and interesting to pedestrians.

ADDITIONAL GUIDELINES FOR PARKING LOTS WITH MORE THAN 10 SPACES

- 106. Parking areas shall include landscaped areas, defined by concrete curbs with landscaping, to provide visual breaks between clusters of approximately 10 stalls.

Example of fine-scale architectural details being applied to support a heritage aesthetic, such as in the downtown (guideline 103).

- 107. Minimum landscape area dimensions shall be sufficient to support a tree at maturity.
- 108. Parking areas shall incorporate low-impact rainwater management solutions.
- 109. The termination of parking aisles shall be landscaped.
- 110. Tree planting is required throughout all parking areas where practicable given parking lot circulation and other site constraints. Tree planting plans should achieve 50% of the parking lot covered with tree canopy at tree maturity.

ADDITIONAL GUIDELINES FOR OLD ORCHARD AND TERMINAL ADDITION HERITAGE NEIGHBOURHOODS *(Map 3a)*

- 111. The orientation, scale, form, height, and materials proposed for a residence shall reflect and enhance heritage theme characteristics and neighbouring buildings.
- 112. Buildings must be designed in context with surrounding low-density residential buildings.
- 113. Variety, continuity, and pedestrian interest should be expressed in the design of buildings, especially at the ground level.
- 114. Design components that contribute to heritage-oriented architectural interest shall be incorporated. These include multiple gables, dormers, bay windows, decorative shingles, wood trim, porches, and verandas.
- 115. Roofs shall have substantial slope, articulated lines, and be designed to reduce the bulk of upper floors. Roof slopes with greater than 6:12 pitch are preferred; however, proposals for lower-pitch rooflines with significant articulation and design interest may be considered.
- 116. Front doors shall be clearly visible and accessible from a public street or publicly accessible pathway and shall be defined by porches, dormers, port cochere, canopies, or be recessed.
- 117. The design and finishing around windows and exterior doors should visually enrich the building elevation.
- 118. The landscape plan shall include fruit trees.

Map 2 Old Orchard and Terminal Addition Heritage Neighbourhood

DPA-2: SMALL-SCALE MULTI-UNIT RESIDENTIAL

JUSTIFICATION:

This Development Permit Area provides direction for housing and related development that meet the needs of residents while fitting well into the existing community. The intent is to support three to four dwelling unit residential infill development, and redevelopment that demonstrates a high standard of creative building design. It also promotes development that considers protection of the natural environment, energy efficiency, water conservation and the reduction of greenhouse gas emissions.

Pursuant to Section 488(1)(a)(e)(h)(i) and (j) of the *Local Government Act*, this designation applies to all three-and four-dwelling-unit residential developments within the boundaries of the City of Courtenay. Additional guidelines apply in special heritage consideration areas (as shown on enclosed Map 2 - Old Orchard & Terminal Addition and Map 3 - 40 Houses Heritage Neighbourhood).

Objectives:

1. Establish guidelines for ground orientated, infill development in existing and new neighbourhoods that contribute to the preservation of the neighbourhood character while meeting city goals for housing diversity, gentle density, and access to employment and services.
2. Ensure new development contributes to the continuity and preservation of heritage resources and special neighbourhood character of Old Orchard and Terminal Addition Neighbourhood and 40 Houses Neighbourhood.

3. Promote a high standard of building, site planning and landscape design.
4. Encourage development that supports multi-modal transportation options and neighbourhood connectivity.
5. Encourage new development that considers protection of the natural environment, water conservation and energy efficiency in site planning and design.
6. Promote net zero emissions in new development, including alterations or additions to existing buildings.

GUIDELINES

Site Planning

1. Housing development should be planned in a comprehensive manner that considers the interface between the site, adjacent development, other land uses and its relationship to the public realm.
2. The design of the site should consider access to and efficiency of pedestrians, bicycles and vehicular circulation.
3. A minimum average of 20 m² of usable private outdoor spaces should be provided for each dwelling unit in the form of a deck, balcony, patio or yard, exclusive of common amenity areas.
4. Outdoor spaces should be located to maximize sunlight, minimize noise disruptions, and minimize 'overlook' from adjacent units.
5. Site planning shall consider the location of third-party utilities, such as clearance from overhead and pad mounted electrical utilities as required by the Canadian Electrical Code.
6. Site planning should consider opportunities to retain and integrate mature trees and existing natural features. Site planning shall consider impact to mature trees and their root systems on adjacent lands.

Public Realm and Streetscape

1. Building design including the placement of windows, balconies, and doors shall consider visual privacy between residences, and perimeter fencing and/or landscaping shall provide visual privacy of adjoining properties.
2. Buildings should be sited to face the fronting street(s). Consideration should be given to preserve adequate space for landscaping, privacy and light penetrating into living spaces.

Example of a building with shifts in massing and changes in exterior colours and textures and high-quality siding and west coast character (Building Design 3 and 4).

3. Principal entrances to a residence should be clearly defined using lighting, colour, paving texture, landscaping and/or enhanced architectural features, such as porches, patios, canopies, or recessed entryways.
4. On corner lots, all street-facing elevations should have an equal level of quality and design detailing.
5. For corner sites with no lane access, driveway access from the flanking street for one or more of the units is encouraged where both feasible and supported by the Development Services Department.
6. Parking and driveways should where feasible not occupy more than 50% of the area of the front yard and, where the site has a flanking side street, not more than 50% of the area of the flanking side yard.
7. Where a laneway exists, parking should access the lane where feasible.
8. Entrances and exits to parking areas shall be located and designed to reduce potential modal conflicts, maintain visual sight lines and limit impact to the transportation network.

Building Design

1. Buildings should be architecturally coordinated and provide a high quality of design. Building design should avoid repetition and monotony through subtle design variation between buildings on neighbouring properties.
2. Buildings should be designed to avoid large expanses of blank walls by incorporating architectural details, artwork, or sufficient landscaping to create visual interest.
3. Buildings should be designed to minimize their bulk with simple shifts in massing, roof articulation and use of varied architectural details, changes in exterior colours and textures.
4. Buildings should be designed with consistently high-quality and durable materials. West Coast architecture that incorporates natural design elements and materials such as exposed timber structural elements, native trees, vegetation landscaping and open concepts for natural light is encouraged.
5. Building roofs should minimize heat island effect and heat transfer into the building, such as through Energy Star-rated or high-albedo colour and materials.
6. Staircases to stacked units shall have weather protection and are encouraged to be indoor or screened from the street(s).
7. Building lighting should be designed to minimize spillage and glare to neighbouring properties, adjacent roads, Environmentally Sensitive Areas, and the sky.
8. Garbage and recycling storage should be located within a secure building or structure and not in any yard facing a road.

9. Where individual unit heat pumps are used, they should be screened.

Landscaping

1. Existing, native vegetation within the Development Permit Area should be retained to the extent feasible to minimize disruption to habitat and to protect against erosion and slope failure where applicable.
2. Landscaping shall include a mixture of tree, shrub, ground cover and perennial plants. Tree selection for optimizing tree canopy and providing a mixture of deciduous and conifer species is encouraged.
3. Proposed planting should prioritize the selection of local plants that provide habitat, nesting, pollinator, foraging, or other biodiversity benefits and are drought tolerant.
4. Proposed planting species adapted to future climate conditions should be incorporated to the maximum extent possible.
5. Proposed planting may consider edible species and active urban agricultural uses.
6. Proposed planting should be provided in strategic locations to frame building entrances, soften edges, screen parking areas, and break up long facades where feasible.
7. Most or all of the landscaped areas should be designed to require little or no irrigation, through use of planting materials and impervious surfaces. Hand watering is encouraged. If irrigation is supplied, it should be limited to an underground system designed with high-efficiency targeted drip heads and automated weather sensors and use captured rainwater and greywater where possible.

8. Sufficient soil volumes shall be provided to support mature vegetation, including trees where applicable. This may include supplementing soil volume with structural soil or silva cell type systems within hardscape areas. Minimum depth of topsoil or amended organic soils must be provided:

- Shrubs – 450 mm
- Ground cover and grass – 300 mm, and
- Trees – 300 mm around and below the root ball, typically to a minimum total of 900 mm.

In addition, 15 m³ is the minimum soil volume per tree, to be supplemented in hardscape zones with structural soil or silva cell type systems.

9. Topsoil or composted waste shall be used to assist in infiltration and increase the water holding capacity of landscaped areas.
10. All new, replacement, and upgraded street lighting in existing and proposed developments shall be LED Full-Cut Off/ Flat Lens (FCO/FL) luminaries to light roads, parking, loading and pedestrian areas. Exterior building lighting fixtures will also be required to be FCO.
11. To reduce impervious surfaces, permeable paving material such grassed cellular paving, porous pavers, or a comparable alternative are encouraged for driveways and parking areas.

Additional Guidelines for Mobile Home Parks

1. The design of the overall Mobile Home Park shall be based on a comprehensive concept and shall give adequate attention to the attractive layout of the mobile home lots and structure placement, landscape character and design, location and screening of parking areas, design and placement of recreation areas, and design of vehicular and pedestrian circulation.
2. Formalized pedestrian access shall be provided throughout the property to connect internal streets and parking areas with semi-private areas for residents, and to the public walkway system.
3. A landscaping plan including tree planting plan for internal streets that provides for appropriately selected species at approximately 15-metre intervals shall be provided.

Example of a pervious driveway treatment to allow for rainwater infiltration (Landscaping 11).

ADDITIONAL GUIDELINES FOR THE OLD ORCHARD AND TERMINAL ADDITION NEIGHBOURHOODS *(Map 3a)*

1. The orientation, scale, form, height, and materials proposed for a residence shall reflect and enhance heritage theme characteristics and neighbouring buildings.
2. Vehicle parking and access should be located at the side or rear and set back from the primary dwelling façade.
3. Garages incorporated into the building structure should not project beyond the front elevation.
4. Roofs shall have substantial slope and articulated lines and be designed to reduce the bulk of a residence on upper floors. Roof slopes with greater than 6:12 pitch are preferred; however, proposals for lower-pitch rooflines with significant articulation and design interest may be considered.
5. Design components that contribute to architectural interest shall be incorporated. These include multiple gables, dormers, bay windows, decorative shingles, wood trim, porches, and verandas.
6. The design and finishing around windows and exterior doors should visually enrich the building elevation. Windows and doors should be articulated with trim.
7. Landscaping should include one or more fruit trees.

Example of a number of design elements such as gables, verandas, and decorative shingles incorporated into a single-residential home to create architectural interest (Additional Guidelines for the Old Orchard and Terminal Addition Neighbourhoods 5).

ADDITIONAL GUIDELINES FOR THE 40 HOUSES NEIGHBOURHOOD *(Map 3b)*

1. One-storey buildings, preservation of existing buildings, and simple rectangular massing are encouraged.
2. Maintaining the spatial relationship on the lot to the other houses in the neighbourhood is encouraged, including consistent front yard setbacks.
3. Low-pitch hipped roofs or single gable roofs shall be included.
4. Porch entries shall be minimal in keeping with the development.
5. Siding shall consist of wide plank horizontal wood or materials that resemble this effect.

DPA-3 FARM PROTECTION

Justification:

This Development Permit Area is intended to protect agriculture and farming operations from adjacent new development and to reduce conflicts that could arise between agricultural use and non-agricultural uses through the use of possible requirements for screening, landscaping, fencing and siting of buildings or other structures.

This category applies to all properties adjacent to agriculturally zoned lands, including lands adjacent to those within the Agricultural Land Reserve (ALR) (as shown on Map 4). This includes properties that are within 30 metres of agricultural lands.

The designation and guidelines are in accordance with sections 488 (1) (c) of the Local Government Act.

Objectives:

1. To minimize the conflicts that may arise between agricultural and non-agricultural land uses including as a result of nuisances such as agricultural odor, noise and dust to urban lands, or of urban light, noise and trespass to agricultural lands.
2. To minimize the impact of urban encroachment on agricultural lands.
3. To protect and/or develop effective vegetated buffers along agricultural land boundaries.

Map 4 Agricultural Lands.

Exemptions

A Farm Protection Development Permit will not be required in the following circumstances:

1. The subdivision of land already provides the prescribed agricultural buffer.
2. Subdivision lot line adjustments.
3. Development on an existing lot, that does not require subdivision, and is separated from the ALR due to a slope greater than 30%.
4. A lot that is adjacent to an ALR property that is zoned for public and institutional uses (such as parks, schools, utilities).
5. A lot that has existing vegetation that meets the vegetated buffer requirements in the development permit guidelines as long as the intent of the guidelines for all other requirements have been met.
6. A lot separated by a dedicated road right of way of at least 20 metres wide.
7. Construction, addition or alteration of building or structure not exceeding 10m² (100 ft²) in total gross floor area and where no variance(s) of the Zoning Bylaw is required.
8. Interior / exterior building alterations that do not expand the existing building foundation.
9. Repair, maintenance, alteration or reconstruction of existing legal buildings, structures or utilities, providing there is no expansion of the footprint.

Guidelines

General

1. Developments should generally follow, unless otherwise specified otherwise in the guidelines below, the guidelines and specifications provided in the Ministry of Agriculture Guide to Edge Planning and Agricultural Land Commission Landscaped Buffer Specifications.
2. The subdivision shall be designed to minimize the impacts that may occur between agricultural and urban uses on lands adjacent to agricultural lands.
3. Lots, buildings and structures should be clustered away from the agricultural lands to the maximum extent possible.
4. Topography shall be considered to minimize additional runoff from developed land onto agricultural land and minimize erosion.
5. A minimum 30 metre setback shall be established between future buildable areas and the agricultural land boundary. The 30 metre separation distance may include a watercourse, road, rail, or utility right of way.
6. A minimum 15 metre continuous vegetated buffer width shall be established parallel to the agricultural land boundary.
7. Exceeding a minimum 15 metre wide continuous vegetated buffer parallel to the agricultural land boundary is strongly encouraged to achieve the vegetated buffer widths outlined in the Ministry of Agriculture's "Guide to Edge Planning" most recent edition. When multiple uses occur on the lot, the most stringent vegetation buffer width should be used.

8. A minimum of 5 meter setback between vegetation buffer and the future buildable area shall be established to provide for sufficient access to the building(s).
9. Designing passive open space, including rainwater management infrastructure, next to the edge of any vegetated buffers is encouraged to add additional separation from agricultural and urban uses.
10. Development shall be designed to protect the vegetated buffer from potential negative impacts related to on-site activities (e.g. drainage, recreational pathways, driveways).
11. The road pattern shall be planned in such a way to direct urban traffic away from routes used by farmers to move equipment.
12. Utility extensions into agricultural land shall be avoided.
13. Lighting impacts on to agricultural land shall be avoided.
14. The vegetated buffer shall be located entirely on the non-agricultural side of the property boundary.
15. The vegetated buffer shall be designed, established and maintained to: filter noise, dust, airborne particulates and chemical spray drift from activities on adjacent agricultural land.
16. Existing native vegetation within the buffer shall be protected wherever possible; existing vegetation may serve as the entire buffer provided it meets the objectives of these development permit guidelines.
17. Vegetation buffer planting material shall be selected from the Ministry of Agriculture's "Guide to Edge Planning", most recent edition, appropriate for Courtenay's climate zone by following the criteria below:
 - a. Non-invasive;
 - b. Not harmful to nearby crops and do not harbor insects or diseases;
 - c. Drought tolerant or require minimal irrigation;
 - d. Low maintenance and require little or no fertilizer;
 - e. Native to the area where possible;
 - f. Adaptable to climate change;
 - g. Beneficial pollinator plants, wherever possible.
 - h. A deterrent to prevent trespass onto farms.
18. The vegetated portion of the buffer shall be a 'no build zone'. The area shall be free of buildings, parking, paved areas, lawn, paths, active and/or passive recreational activities.

19. A fence and educational signage about the boundary shall be installed along the agricultural land boundary and/or property line that meets the following criteria:
 - a. Up to the maximum height permitted by the Zoning Bylaw;
 - b. Solid wood, chain link, or wire mesh fabric;
 - c. According to the fencing specifications found in the Ministry of Agriculture's "Guide to Edge Planning", most recent edition.
 - d. Existing fencing may be utilized provided it is in good condition and meets the fencing guidelines.
20. The vegetated buffer shall be delineated and protected prior to the issuance of building permit.
21. A Statutory 219 Covenant shall be registered on title in order to secure the landscaping and fencing measures prescribed, including maintenance, and ensure adherence to recommendations outlined in professional reports, and/or to notify land owners of the potential for land use conflicts due to active farm operations on the adjacent agricultural lands.

DPA 4 – ENVIRONMENTAL

JUSTIFICATION:

This Development Permit Area is intended to protect ecosystems and features that provide habitat for aquatic and terrestrial species, preserve biodiversity, and provide ecosystem services, when conducting development near Environmentally Sensitive Areas. Where the term Environmentally Sensitive Area (ESA) is used, it is meant to include the buffers, also known as protection setbacks, of that ESA.

This category applies to all lands shown on the Terrestrial Environmentally Sensitive Area Map D-4 and the Aquatic Environmentally Sensitive Map D-5 as well as to any property that contains an Environmentally Sensitive Area, whether mapped or not. Because not all ESAs are mapped, all properties that are equal to or larger than 4,000 metres square in size are subject to an Environmental Impact Assessment prior to development approvals to confirm the presence or absence of ESAs.

The types of Environmentally Sensitive Areas fall into the following categories:

- **Freshwater aquatic ecosystems:**
Those natural systems that are either permanently or periodically under water. Water may be running, as in a river, stream or springs or still, as in lakes and wetlands, whether connected by surface flow to fish bearing waters or not. This includes their riparian areas, specifically lands within 30 metres of the natural boundary of such ecosystems. These ecosystems may also be subject to provincial Riparian Areas Protection Regulation (RAPR). (Shown in Map D-5).
- **Estuary and marine shorelines:**
The waters and lands adjacent to the K'ómoks Estuary as well as the Courtenay River and including to the Condensory Bridge at Anderton Avenue and Condensory Road.

- **Terrestrial ecosystems:**
Those ecosystems that are land-based. Common designations follow the provincial Sensitive Ecosystem Inventory categories: seasonally flooded agricultural fields, terrestrial herbaceous, older forest, older second growth forest, sparsely vegetated (cliffs and bluffs), wetland, riparian, and woodland such as Garry Oak ecosystems. (Shown in Map D-4).
- **At-risk species and ecological communities:** These include, but are not limited to, species listed under the federal Species at Risk Act (SARA) and species and ecological communities provincially designated as red- or blue-listed.
- **Ecosystems Connectivity Areas:**
The Biogeoclimatic Zone in which Courtenay is situated (the Coastal Western Hemlock, very dry maritime, CWHxm) is one of the most at risk in BC. The greatest opportunities for protecting at-risk ecological communities within this zone are generally represented in the Ecosystem Connectivity Area Opportunities shown on Map D-4 Terrestrial Environmentally Sensitive Areas. The map includes gaps in the corridor that will require restoration.
- **Raptor and heron nests:**
Under the BC Wildlife Act, the nest of an eagle, peregrine falcon, gyrfalcon, osprey, heron, or burrowing owl is protected whether occupied by a bird or its egg or not. Raptors are a term used to describe birds of prey including hawks, owls, falcons and eagles. This includes the nests themselves and their setbacks as determined by a Registered Professional Biologist.

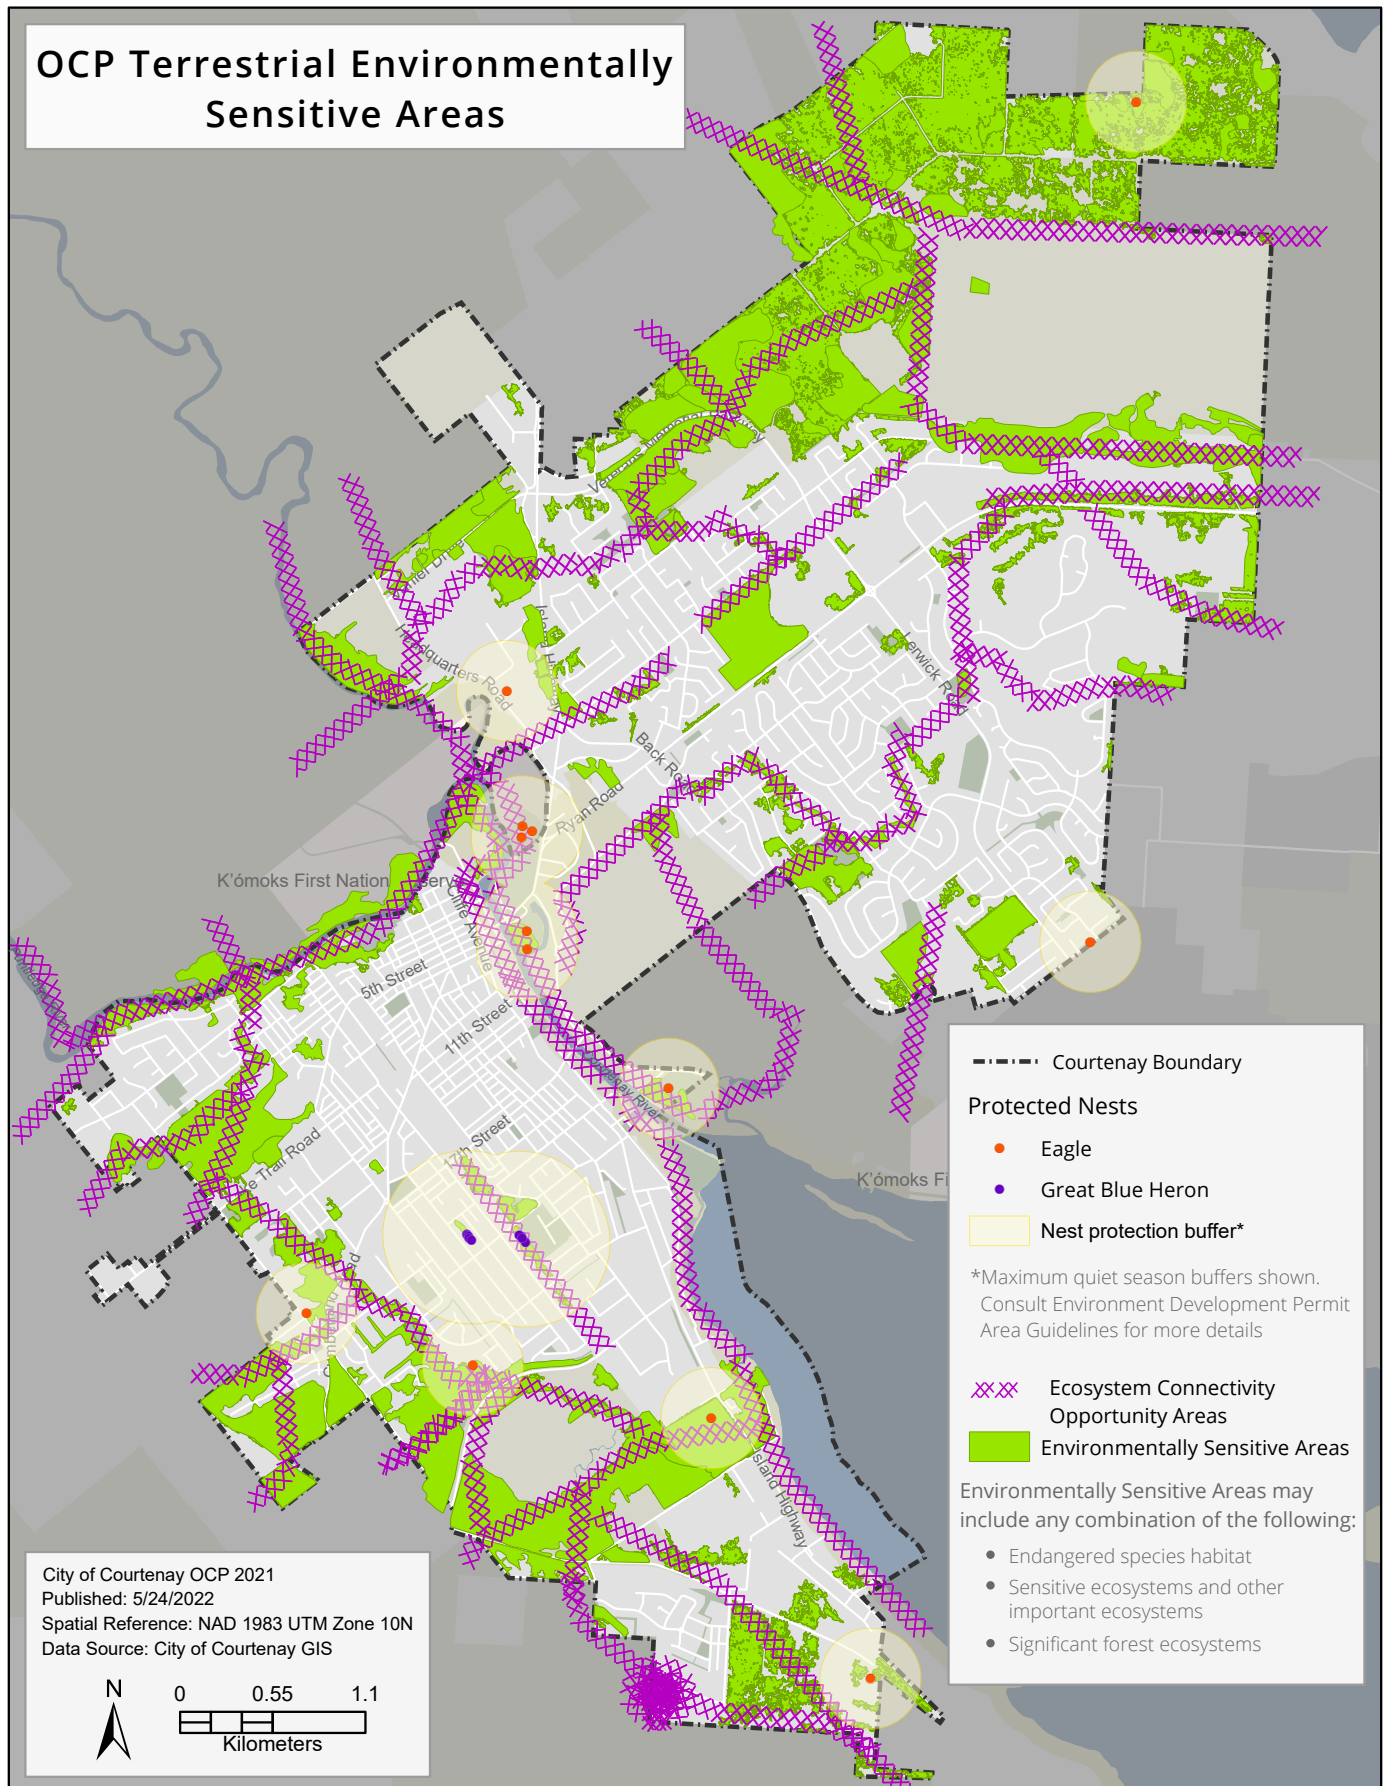

The designation and guidelines are in accordance with sections 488 (1) (a) of the Local Government Act.

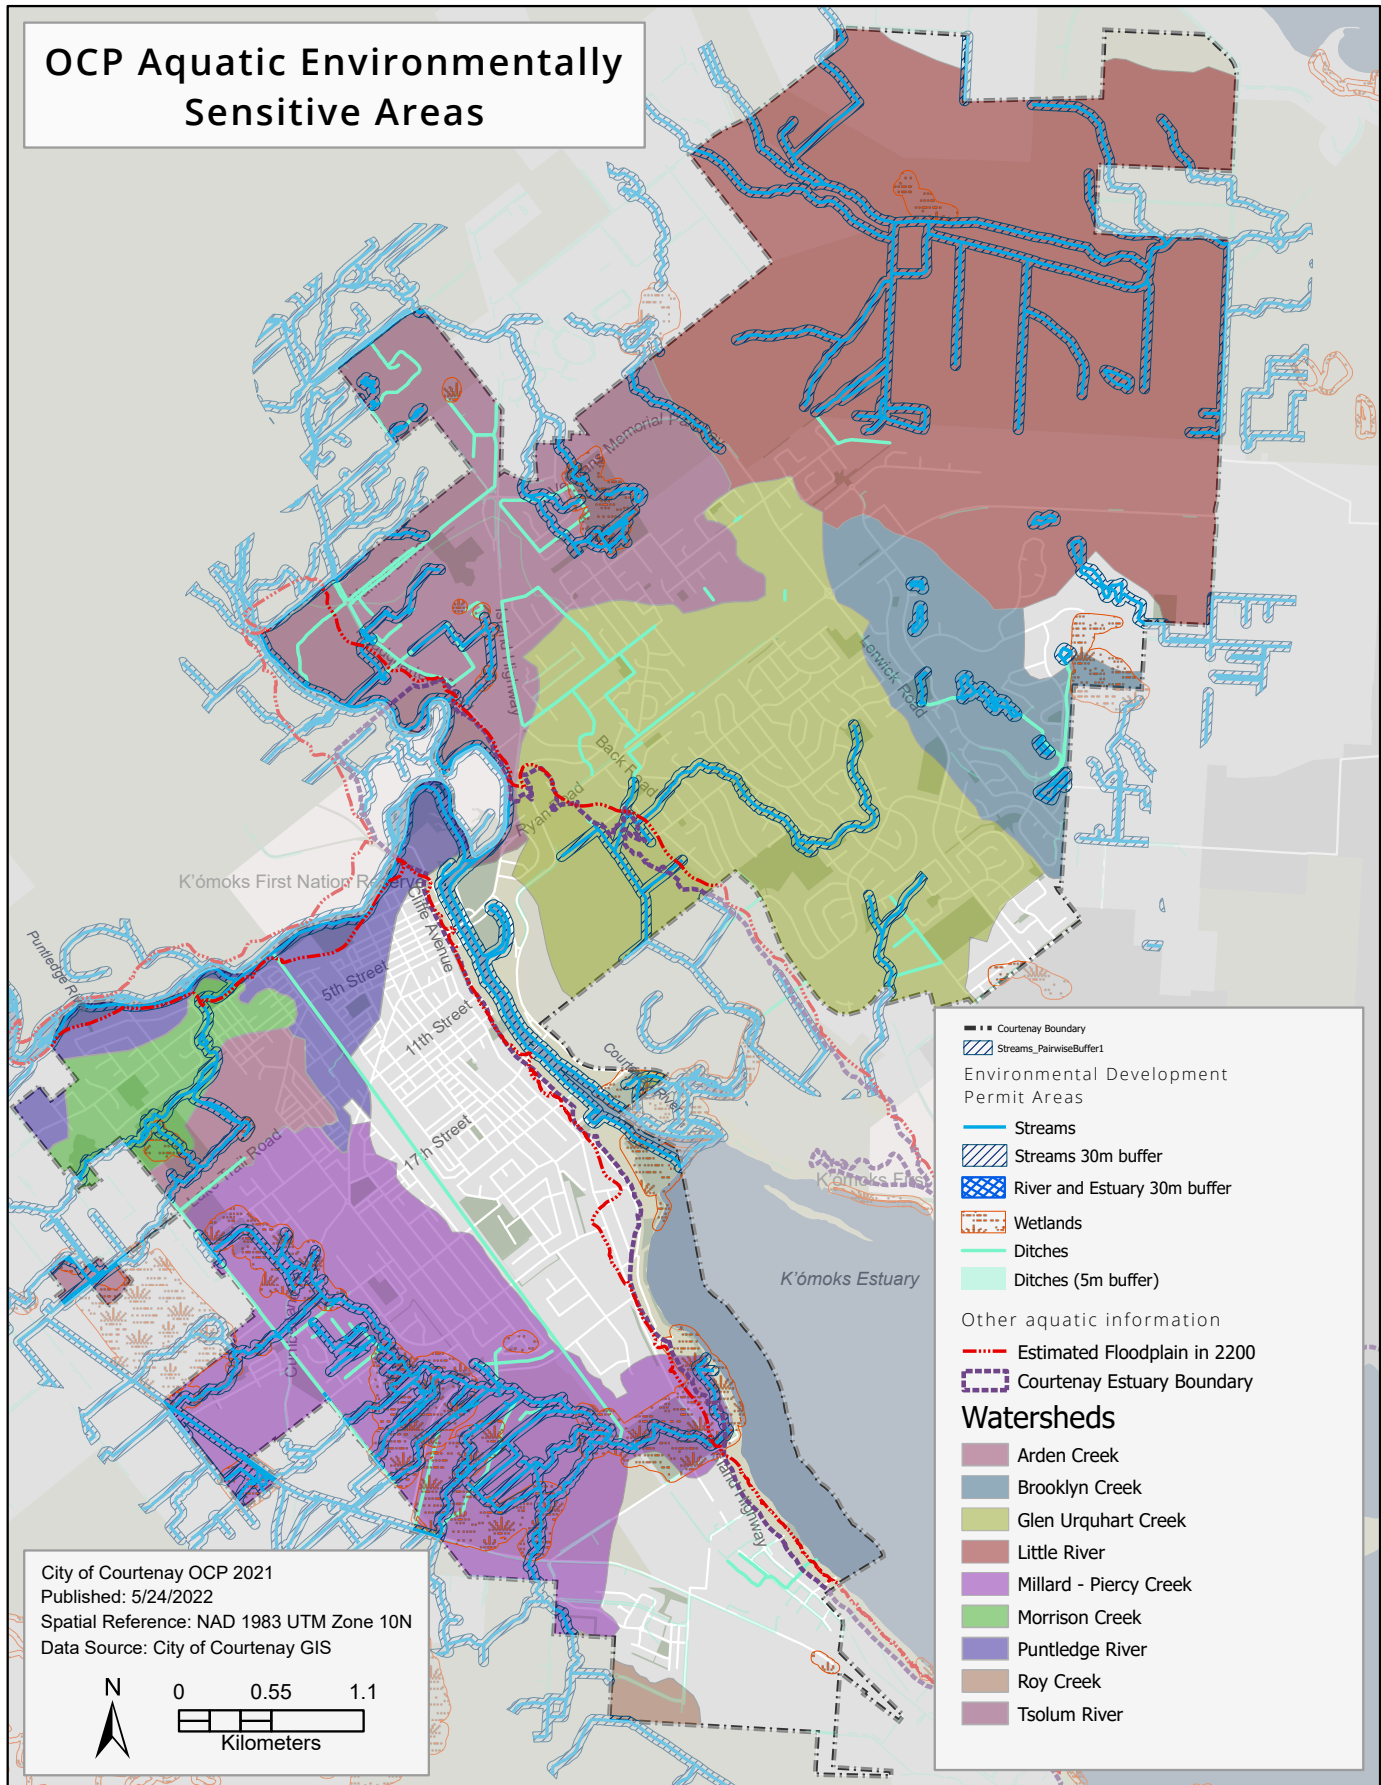

The City of Courtenay's regulations do not negate the need for compliance with any federal or provincial statutes and regulations governing the management of the environment and wildlife.

Objectives:

1. Protect areas of high biodiversity and ecological sensitivity within Courtenay including ground and surface water, shorelines, forests, wildlife and important wildlife habitats, ecosystem features and functions, and rare and endangered ecosystems, ecological communities and species.
2. Maintain ecosystem connectivity.
3. Restore and enhance previously degraded ecosystems.
4. Ensure that ecosystem protection and enhancement values are elevated and prioritized in the development design and review process, and specify where and how lands are developed around Environmentally Sensitive Areas.
5. Protect and enhance water quality and prevent contamination of water from land use and development activities.
6. Meet and generally exceed the Riparian Areas Protection Regulation (RAPR) requirements.
7. Provide comprehensive environmental protection guidelines that are scientifically rigorous, clear, and transparent to development applicants and the greater community.

Map 5 Terrestrial Environmentally Sensitive Areas.

DESIGNATED AREAS & ACTIVITIES

The Environmental Development Permit Area applies to all privately-owned land within the City of Courtenay unless subject to a defined Exemption (Exemptions Section follows).

Unless exempt, a development permit addressing the Environmental Development Permit guidelines in this chapter must be approved before any development may take place. Development includes any of the following:

- removal, alteration, disruption, or destruction of vegetation
- disturbance of gravel, sand, soils and/or peat
- deposition of gravel, sand, soil, and/or peat
- construction, erection, or alteration of buildings and structures
- creation of non-structural impervious or semi-pervious surfaces
- flood protection works
- preparation for or construction of roads, trails, docks, and bridges
- provision and maintenance of sewer and water services
- development of drainage systems
- development of utility corridors
- blasting

GENERAL STRUCTURE

The structure of the Environmental Development Permit Area Guidelines follows the following format:

- **General Guidelines** - These generally apply to all types of development.
- **Additional Guidelines** - These apply additionally to specific types of Environmentally Sensitive Areas and are listed in box insets.

Where a property contains or is adjacent to more than one Environmentally Sensitive Area, all applicable development permit guidelines shall be followed.

EXEMPTIONS

An Environmental Development Permit (EDP) will not be required in the following circumstances:

1. No Environmentally Sensitive

Area. The absence of an ESA shall be demonstrated as follows:

- a. Properties that are smaller than 4,000 square metres in size and do not contain an ESA shown on Maps 5 or 6 (Terrestrial and Aquatic Environmentally Sensitive Areas) are exempt.
- b. Properties that are equal to or larger than 4,000 square metres in size will require an Environmental Impact Assessment (EIA) in order to evaluate the presence of Environmentally Sensitive Areas.
 - i. Where an ESA had previously been identified, but is no longer present, the City will take into account whether the ESA is no longer present due to its alteration.
 - ii. Where alteration in the form of land clearing, drainage, or any other alteration that affected the ESA is known to have occurred, the City will require that an EDP be registered on title to include ecological restoration provisions.
 - iii. Where the EIA demonstrates that no ESAs will be affected by the development proposal and where scenario 1.b.ii. does not apply, an EDP will not be required.

2. Pre-existing protection. Where a development permit of this type has already been issued or a conservation covenant under section 219 of the *Land Title Act* is registered against title, is granted to the City or a recognized conservancy and includes provisions which protect the environmentally sensitive area in a manner consistent with the current applicable EDPA guidelines, to the satisfaction of the City of Courtenay.

3. Restoration activities only, including invasive species removal. The proposed works are ecological restoration and enhancement, in accordance with established best management practices and senior government approvals, as required, under the purview of the City of Courtenay. This includes: hand removal of invasive plants or noxious weeds on a small scale with appropriate disposal methods; planting and maintenance of native species trees, shrubs, or groundcovers for the purpose of enhancing the habitat values and/or soil stability. A restoration plan prepared by a Registered Professional Biologist must be presented to the City of Courtenay prior to these activities taking place.

4. Sufficient senior government approvals. Works approved by provincial or federal authorities with respect to the installation of public utilities, sewer and water lines, trail construction, stream enhancement, and fish and wildlife habitat restoration or site inspection.

5. Public infrastructure. Including the repair, maintenance of and improvements to all existing public structures, facilities, open spaces, trails, roads, utilities, and signage meant to include: sanitary sewer, storm sewer, water, natural gas, cable, hydro-electric, and telephone.

6. Emergency procedures. Actions and activities necessary in order to prevent immediate threats to life or property. Any emergency works are to be undertaken in accordance with the Provincial Riparian Area Protection Regulations, Water Sustainability and Wildlife Acts, and the Federal Fisheries Act. Emergency actions by anyone other than authorized personnel must be reported to the City of Courtenay Operational Services Department immediately.

7. Imminently hazardous trees. Removal of a tree that is deemed an imminent hazard to the safety of life or buildings, as determined by an Arborist certified by the International Society of Arboriculture (ISA) with Tree Risk Assessor Certification (TRAC), provided a tree risk assessment report is provided to the City of Courtenay at the property owner's expense and removal is in accordance with the Provincial Riparian Area Protection Regulations, Water and Wildlife Acts, and the Federal Fisheries Act.

8. Farm use in accordance with the Farm Practices Protection (Right to Farm) Act. Provided that the proposed activity on the site will not impact the environmentally sensitive area and the activity relates solely to normal farm practices in accordance with the Act. Non-farming activities and buildings on lands that may otherwise be used, designated, or zoned for agriculture are subject to the EDP guidelines.

9. Limited construction. Specifically:

- a. The construction of a small accessory building if all of the following apply:
 - i. The building is not located within 30 metres of natural boundary of a watercourse or within an environmentally sensitive area or its setback;
 - ii. The building is located within an existing developed area;
 - iii. No native trees are removed;
 - iv. The total area of individual small accessory buildings is less than 10 m².
- b. Additions to existing buildings and structures that do not encroach into the present setback between the existing building and the defined ecologically sensitive feature.
- c. Fences and unpaved paths or trails which are less than one (1) metre in width, provided they are not located within 30 metres of a watercourse, waterbody or marine foreshore and no native vegetation is removed.

10. Repair and maintenance of existing property. Specifically:

- a. Gardening and yard maintenance activities within an existing landscaped area, such as lawn mowing, tree and shrub pruning, vegetation planting and minor soil disturbance that do not alter

the general contours of the land or cause erosion into adjacent watercourses provided that existing native vegetation is not damaged. Use of pesticides is not permitted.

- b. Roads, driveways, paths and trails, provided there is no expansion of the width or length of the road, driveway, path or trail and specifically no expansion of the amount of impervious area.
- c. Renovations, repair, and maintenance to existing buildings, structures, and utilities provided the structure remains on its existing foundation, does not extend the structure footprint either horizontally or vertically beyond its pre-existing condition, and is in compliance with the Local Government Act.

11. Separated by a road. Development within a Riparian Assessment Area where the development is separated from the body of water by a developed public road right of way, provided that no other Environmentally Sensitive Areas, including their buffers, are on the property.

12. Lot consolidation or boundary adjustment. A subdivision involving a lot consolidation or boundary adjustment where no new lots are being created and each remaining lot provides, outside of any environmental protection assessment areas, a building envelope of sufficient area to permit the construction of a standard sized building within the setback building envelope established by the Zoning Bylaw (the construction of a building will require an EDP).

13. Developing near roadside ditches within a public road right of way.

Provisions regarding setbacks from both fish-bearing and non-fish-bearing roadside ditches shall be adhered to at the building permit stage. Five (5) metre leave strips will be required for known fish-bearing ditches. Two (2) metre leave strips will be required for non-fish-bearing ditches. Where it is unknown whether the stream contains fish or not, the five metre leave strip shall apply. An EDP will be required for developing near ditches that are located on private land, and will be subject to the Riparian Areas Protection Regulation if developing within 30 metres of said ditch.

GENERAL GUIDELINES

Site planning

1. Development encroachment on ecosystems and their buffers identified in the EIA shall not be permitted.
2. Connectivity and linkages of ESAs on the property to adjacent ESAs, tree retention areas, and other habitat areas shall be maintained and restored wherever possible to develop a continuous network of ecosystems and minimize fragmentation. This means locating development within the parcel where it will cause the least impact to natural habitat and the movement of native fauna between adjacent areas.
3. Parcel sizes for subdivision parcels, including bare land strata lots, shall be designed to be met exclusive of any ecosystems and their buffers identified in the EIA.
4. Buffer setbacks shall include sufficient distance to protect the roots of vegetation and trees, and address forest stand stability dynamics such as increased windthrow risk following proposed removal.
5. Development on slopes greater than 30% should be avoided due to the high risk of erosion and bank slippage.
6. Grading of lands immediately adjacent to ESAs shall be matched so that engineered slopes do not exceed 3:1 for a distance of five metres from the setback boundary.
7. Development and subdivision shall be planned, designed, and implemented in a manner that supports the maintenance and restoration of natural system functions including watercourse hydrology and groundwater recharge. This includes:
 - a. Managing rainwater in accordance with the Water Balance Model or the most recent integrated watershed management or rainwater policy and design manual;
 - b. Managing rainwater on site and maintaining pre-development drainage flows. Developments shall not result in an increase to post-development surface water flows, or affect the quality of the water availability within the non-disturbance areas, unless specified in the Development Permit;
 - c. Using pervious surfaces such as absorbent landscape, pervious pavement, and similar stormwater source controls as much as practicable; and
 - d. Ensuring a minimum of 20 centimeters of topsoil on all future lawn areas.

8. Natural features including soil, groundwater, native vegetation, and tree cover throughout the development should be preserved in addition to Environmentally Sensitive Areas. This includes:
 - a. Meeting or exceeding a tree density target of 50 trees per net developable hectare, as described in the Tree Protection and Management Bylaw 2850
 - b. Except where ecosystems are characterized by isolated trees (e.g., terrestrial herbaceous ecosystems), conserving groups of trees along with their associated understories rather than isolating individual specimens.
 - c. Preserving large, wind-firm trees (living and dead) and veteran recruit trees, particularly within 500 metres of large water bodies, for the purposes of supporting raptor habitat (nesting and perching).
 - d. Preserving native vegetation and tree cover means also preserving their roots.
9. Habitat structures such as old trees, snags, trees with cavities, trees with perches for raptors, leaf litter, fallen debris, and ephemeral wetlands shall be maintained in a manner that balances FireSmart principles and public safety with ecosystem restoration under the guidance of a Registered Professional Biologist.
10. Disturbance to nesting sites and breeding areas as identified in the EIA is prohibited.
11. Wildlife crossings wherever wildlife corridors are interrupted by roadways, as determined by the EIA, shall be included.
12. Unutilized existing structures should be removed from ecosystems and their buffers identified in the EIA.
13. Lighting shall be designed to provide the minimum necessary for safety purposes and to avoid light intrusion throughout the parcel and particularly within the ESA.
14. Landscape requirements on the property, outside of the Environmentally Sensitive Areas, shall be complementary and supportive of the habitat types and ecosystem values within the protection areas.
15. The ecological value of the ESA should be enhanced by adding habitat features such as nest boxes.
16. Dedication of the Environmentally Sensitive Area, including a stream and surrounding areas, to the City of Courtenay for the preservation of the area, prior to development or subdivision of land containing or adjacent to an ESA is encouraged. These lands may not be donated in lieu of five percent parkland subdivision requirement.

Restoration and recovery

17. Environmental restoration may be required where an area has been previously cleared of native vegetation, or is cleared during the process of development. Recovery efforts may be required to enhance or re-introduce species, subspecies and populations where species are threatened, endangered, or extirpated.
18. Disturbed areas, areas of invasive species removal, or where planting stock is thin or bare shall be replanted or supplemented within the ESA identified in the EIA. Restoration plans are subject to the following guidelines:
 - a. Restore disturbed areas quickly (with consideration given to hydrologic and climatic variables) to minimize erosion, ensure sediment control, and prevent the spread of invasive species.
 - b. Use trees, shrubs, and ground cover native to the area and adapted to specific site conditions today (soil type, sun shade, and moisture) and for a changing climate, and promote habitat and erosion control functions.
 - c. Replace removed trees based on the recommendations of the EIA.
 - d. Seed those areas not covered or restored with trees, shrubs, or groundcover with native herbaceous plants, grasses, or legumes.
19. Artificial habitat features such as nesting boxes, spawning beds, and modified wildlife trees, snags, and raptor perching trees should be located where safe to do so.
20. Restoration and recovery plans must:
 - a. Be prepared by a Registered Professional Biologist.
 - b. Address opportunity for retention of existing native vegetation within the development area(s), use native species, recommend timing for plantings, provide cost estimates for the works, and recommend monitoring measures during and after said works.
 - c. Include restoration recommendations for artificial habitat features where applicable.
 - d. Be accompanied with securities to fulfill the restoration works in accordance with the Development Procedures Bylaw.
 - e. Be monitored for a minimum of five years following restoration activities.

Fences, trails, and signage

21. ESA including individual trees should be protected with permanent fencing and shall follow the protection measures identified in the EIA.
22. Fencing shall prevent encroachment into the protected areas, while also allowing for wildlife passage, as identified in the EIA. Permanent fencing specifications are to be approved by the City. Fencing must be installed sensitively so as not to damage tree roots.
23. ESA shall be protected from intrusion by motor vehicles with a curb or other suitable protective barrier if roads, driveways, or parking areas abut the ESA.
24. Trails, including stairways, where applicable, shall be designed to:
 - a. Minimize the impacts of recreational use on ESAs and adjacent natural areas and systems;
 - b. Minimize slope disturbance and changes to natural drainage patterns; and
 - c. Be designed to prevent unauthorized motorized vehicle use to the maximum extent possible.
25. Permanent signage to identify the ESAs and their values should be provided in areas where public access is provided.

Construction phase

26. Work shall be scheduled during times that minimize impact to all identified wildlife, recognizing that different species have different sensitive timing windows and some seasons pose greater development risk. For example, soil disturbance activities should be completed during the dry months of the year, while tree and vegetation cutting should occur outside of nesting windows. This includes taking care to schedule sensitive activities:
 - a. Outside of known wildlife migration seasons;
 - b. Outside of breeding, birthing, and rearing seasons (refer to Section 4 of 2014 Develop with Care Manual for breeding least risk windows where available, and Registered Professional Biologist for recommendations); and
 - c. Within least risk regional timing windows for aquatic species.
27. The roots of trees and native vegetation shall be protected during construction. Temporary fencing should be a minimum height of 1.2 m and supported by poles placed at 2.5 m intervals. The fence will remain in place throughout clearing, site preparation, construction, or any other form of disturbance. Fencing must be installed sensitively so as not to damage tree roots.
28. Invasive plant species shall be removed, controlled, and disposed of using site and species appropriate methods and under the guidance of a Registered Professional Biologist.
29. Native plants of high conservation value should be salvaged prior to clearing.
30. Foreign material shall not enter into any ESAs, including – without limitation – stockpiled materials and vehicles, garbage, greases, oils, gasoline, sediments, pesticides and other contaminants during and after the construction phase of the proposed development.
31. Sediment containment and erosion control measures shall be installed prior to any development activity and ensure they are regularly maintained to fulfill their purpose.
32. Environmental monitoring may be required to confirm the completion and compliance with required conditions of the Development Permit. Where required, monitoring shall include regular reports prepared by a Registered Professional Biologist, during construction and for the duration of the works and maintenance period.
33. A phased clearing approach may be required on large developments that are expected to be developed over a number of years in order to reduce erosion and sediment risk.

ADDITIONAL GUIDELINES FOR DEVELOPMENT SUBJECT TO RIPARIAN AREAS PROTECTION REGULATION

The Riparian Areas Protection Regulation (RAPR) is a provincial regulation that calls on local governments to protect riparian areas during residential, commercial, and industrial development ensuring that a Qualified Environmental Professional conducts a science-based assessment of proposed activities and develops mitigation measures to avoid impacts from development to fish and fish habitat, particularly riparian habitat.

Local governments must provide protections that meet or exceed these provincial requirements. The guidelines provided below fulfill this objective and clarify when a RAPR assessment report is required as part of an EDP application. The general intent of these guidelines is to require a 30 metre setback in all possible instances, and to defer to the Riparian Area Protection Regulations methodologies for determining stream setbacks only in instances where the property will be undevelopable otherwise.

34. A 30 metre setback shall be provided from the stream boundary on all properties subject to the Riparian Areas Protection Regulation (RAPR). This means:

- a. An Environmental Development Permit (EDP) is required for development on a property that is subject to the RAPR, including on a property that contains a stream or any portion of a Riparian Assessment Area, even if development is not planned for within the Riparian Assessment Area.

- b. For new development subject to the RAPR a 30 metre setback from the stream boundary is required. In such instances the City does not require the submission of an RAPR assessment report as part of the EDP application.
- c. New lot subdivision within the 30 metre setback is not permitted.

35. The following exceptions apply to the 30 metre setback of a stream:

- a. Where a 30 metre setback from the stream boundary results in the property being unable to accommodate any development at all under the designated zoning, the RAPR determined setbacks (Streamside Protection and Enhancement Area, SPEA) may apply.
- b. Where existing structure(s), parking facilities, and landscape areas already encroach into the 30 metre setback.
 - i. When reconstructing or adding to an existing structure is proposed, the RAPR report and enhanced restoration measures that improve the existing condition of the setback are required as part of an EDP application.
 - ii. In the case of redevelopment, the 30 metre setback requirement shall apply wherever possible. However, should it not be possible, then the RAPR assessment report shall set the minimum setback and enhanced restoration measures that improve the existing condition of the setback are required as part of an EDP application.

- c. A policy of net habitat gain, including restoration, shall be adopted wherever a 30 metre setback cannot be achieved due to existing development setbacks, and where the property has space for habitat gain.

36. RAPR reports must be authored or reviewed and signed off by a Registered Professional Biologist.

ADDITIONAL GUIDELINES FOR DEVELOPING NEAR THE K'ÓMOKS ESTUARY AND MARINE SHORELINE

- 37. A natural, vegetated buffer strip within the first 30 metres above the natural boundary of the sea or Courtenay River (including up to Condensory Bridge) shall be maintained except where access is essential for water transport or public use.
- 38. A policy of net habitat gain shall be adopted wherever a 30 metre setback cannot be achieved due to existing development setbacks.
- 39. Aquatic, riparian, and upland areas that have been lost or degraded by previous land uses shall be restored to maximize their value as fish and wildlife habitat.
- 40. Where recreational greenways along the Courtenay River and K'ómoks Estuary are required, public access shall be chosen with respect for estuarine and riparian habitat functions.
- 41. Shoreline scenic and aesthetic qualities that are derived from natural or cultural features, such as shoreforms, natural vegetative cover, scenic vistas, diverse landscapes, historic structures, and rural and wilderness-like shores shall be maintained.

42. Suitable raptor nesting and perching trees identified in the EIA, including veteran recruit trees and trees with natural cavities shall be protected. Where no suitable perching trees are present, the possibility of pruning mature trees in order to make them more attractive to raptors shall be examined.

43. Groups of trees rather than isolated trees shall be retained where possible, to provide an interlocking tree canopy and support tree health.

44. Following the Green Shores Coastal Development Rating System is strongly encouraged including designing to preserve and protect natural beach transportation processes in their natural state.

ADDITIONAL GUIDELINES FOR DEVELOPING NEAR RAPTOR AND HERON NESTS

45. Raptors and herons routinely establish new nests and therefore not all nests may be shown on Map 5 "Terrestrial Environmentally Sensitive Areas." The guidelines apply whether a nest is mapped or not.

46. A naturally vegetated "no development" buffer shall be maintained. The buffer must be based on scientifically established recommended minimum setbacks and determined by a Registered Professional Biologist with experience in assessments for the species in question. Refer to "Table 2 General guidance on raptor and heron nest setbacks."

47. An additional "no disturbance" quiet buffer shall be maintained during breeding seasons. During this time no development activities may take place unless a Registered Professional Biologist provides a mitigation plan to allow identified activities to occur.

48. Both existing and potential nest sites and perching trees as identified in the EIA shall be protected within the vicinity of the nest tree including veteran recruit trees and trees with natural cavities. Where no suitable perching trees are present, examine the possibility of

pruning mature trees in order to make them more attractive to raptors.

49. Groups of trees rather than isolated trees shall be retained where possible, to provide an interlocking tree canopy and support tree health.

Information from Best Management Practices for Raptor Conservation during Urban and Rural Land Development in British Columbia, 2013. Raptor setbacks are measured from the base of the tree; heron setbacks are measured from a line drawn around the outer perimeter of all nest trees.

ADDITIONAL GUIDELINES FOR DEVELOPING NEAR ECOSYSTEM CONNECTIVITY AREAS

50. Connectivity and linkages of ESAs on the property to adjacent ESAs and other habitat areas shall be maintained wherever possible, and in general accordance with the Ecosystem Connectivity Areas Opportunities identified on Map 5, to develop a continuous network of ecosystems and minimize fragmentation. This means locating development within the parcel where it will cause the least impact to natural habitat and the movement of native fauna between adjacent areas.
51. To the maximum extent possible, the distribution and intensity of native vegetation and cover should be maintained throughout the property.
52. New road and linear utility development within Connectivity Areas shall be avoided to the maximum extent possible. If new road and linear utility development cannot be avoided:
- a. The length and width of development shall be minimized;
 - b. Crossings shall be narrow and perpendicular to the connectivity area;
 - c. Appropriate wildlife crossing infrastructure as determined by the mitigation measures described in the bio-inventory shall be designed and installed, using best practices for mitigating the effects of roads on local species.

53. Any fencing or other similar barriers to the movement of identified wildlife shall be designed with wildlife movement in mind.

DPA 5 – HAZARDOUS CONDITIONS – STEEP SLOPES

JUSTIFICATION:

This Development Permit Area is intended to establish a process for hazard assessment over those areas that are susceptible to land slippage and ensure that development is protected from such hazardous conditions.

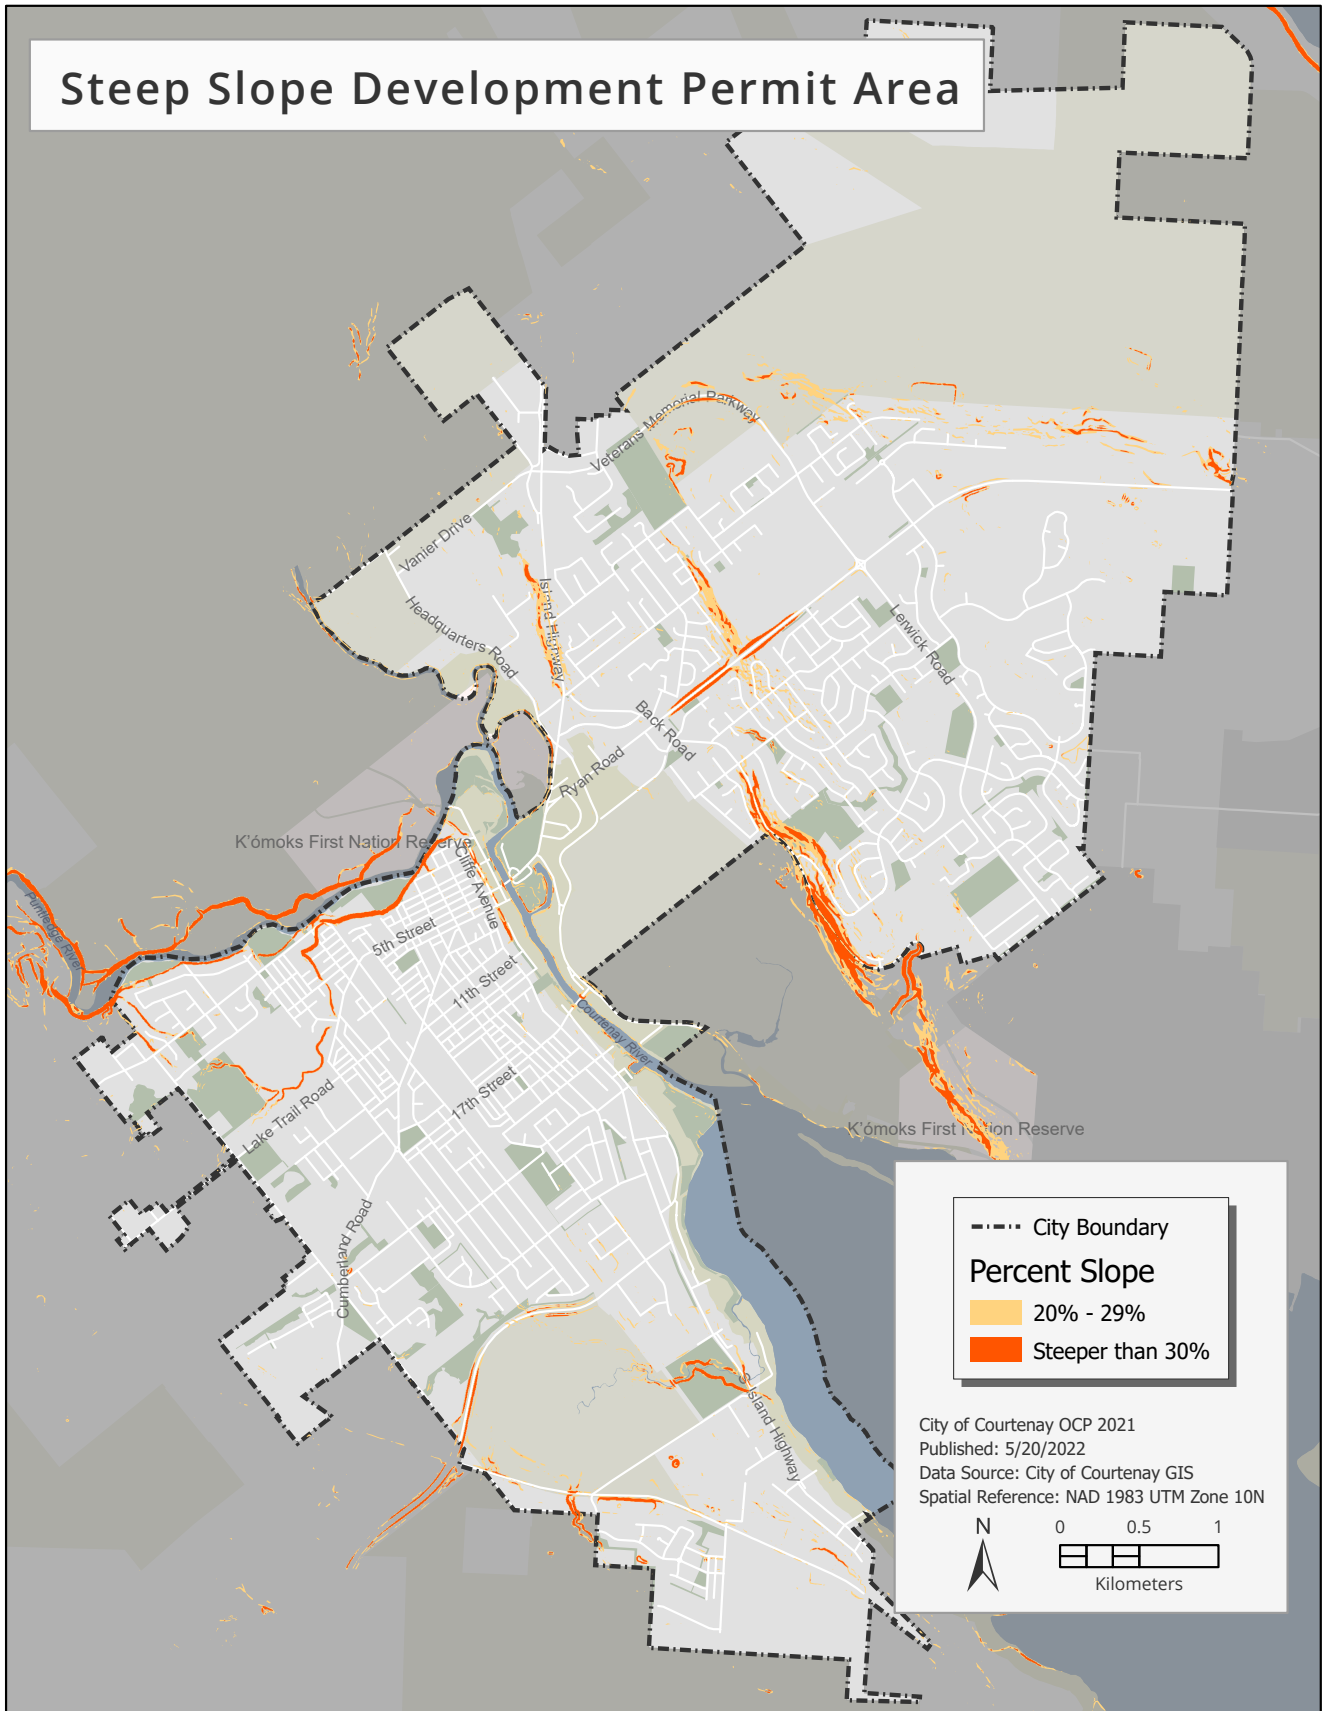

This category applies to all properties containing a slope of equal to or greater than 20% measured over a minimum horizontal distance of 10 metres (as shown on Map 7).

The designation and guidelines are in accordance with sections 488 (1) (b) of the Local Government Act.

Objectives:

1. Minimize the risk to people and property from natural hazards.
2. Provide stable and accessible building sites.
3. Promote development that is appropriate for steep slope areas by respecting terrain, maintaining natural vegetation and drainage patterns.
4. Inform land owners of potential hazards and encourage development and property maintenance that is resilient to hazard risk.

Map 7 Steep Slope Development Permit Area.

Exemptions

1. The proposed development will not be impacted by the identified hazardous conditions.
2. A restrictive covenant is in place which effectively mitigates the hazardous conditions on the property and saves harmless the City of Courtenay.
3. The only activity being proposed onsite relates to the removal of hazardous tree(s), and generally the stump must be retained. For the City to determine whether the proposed development qualifies for this exemption, applicants may be required to provide a report prepared by a certified arborist with Tree Risk Assessment Qualifications.

For the City to determine whether the proposed development qualifies for exemptions, applicants may be required to provide a report on the development and hazardous condition, prepared by a professional engineer or geoscientist experienced in geotechnical engineering (qualified professional).

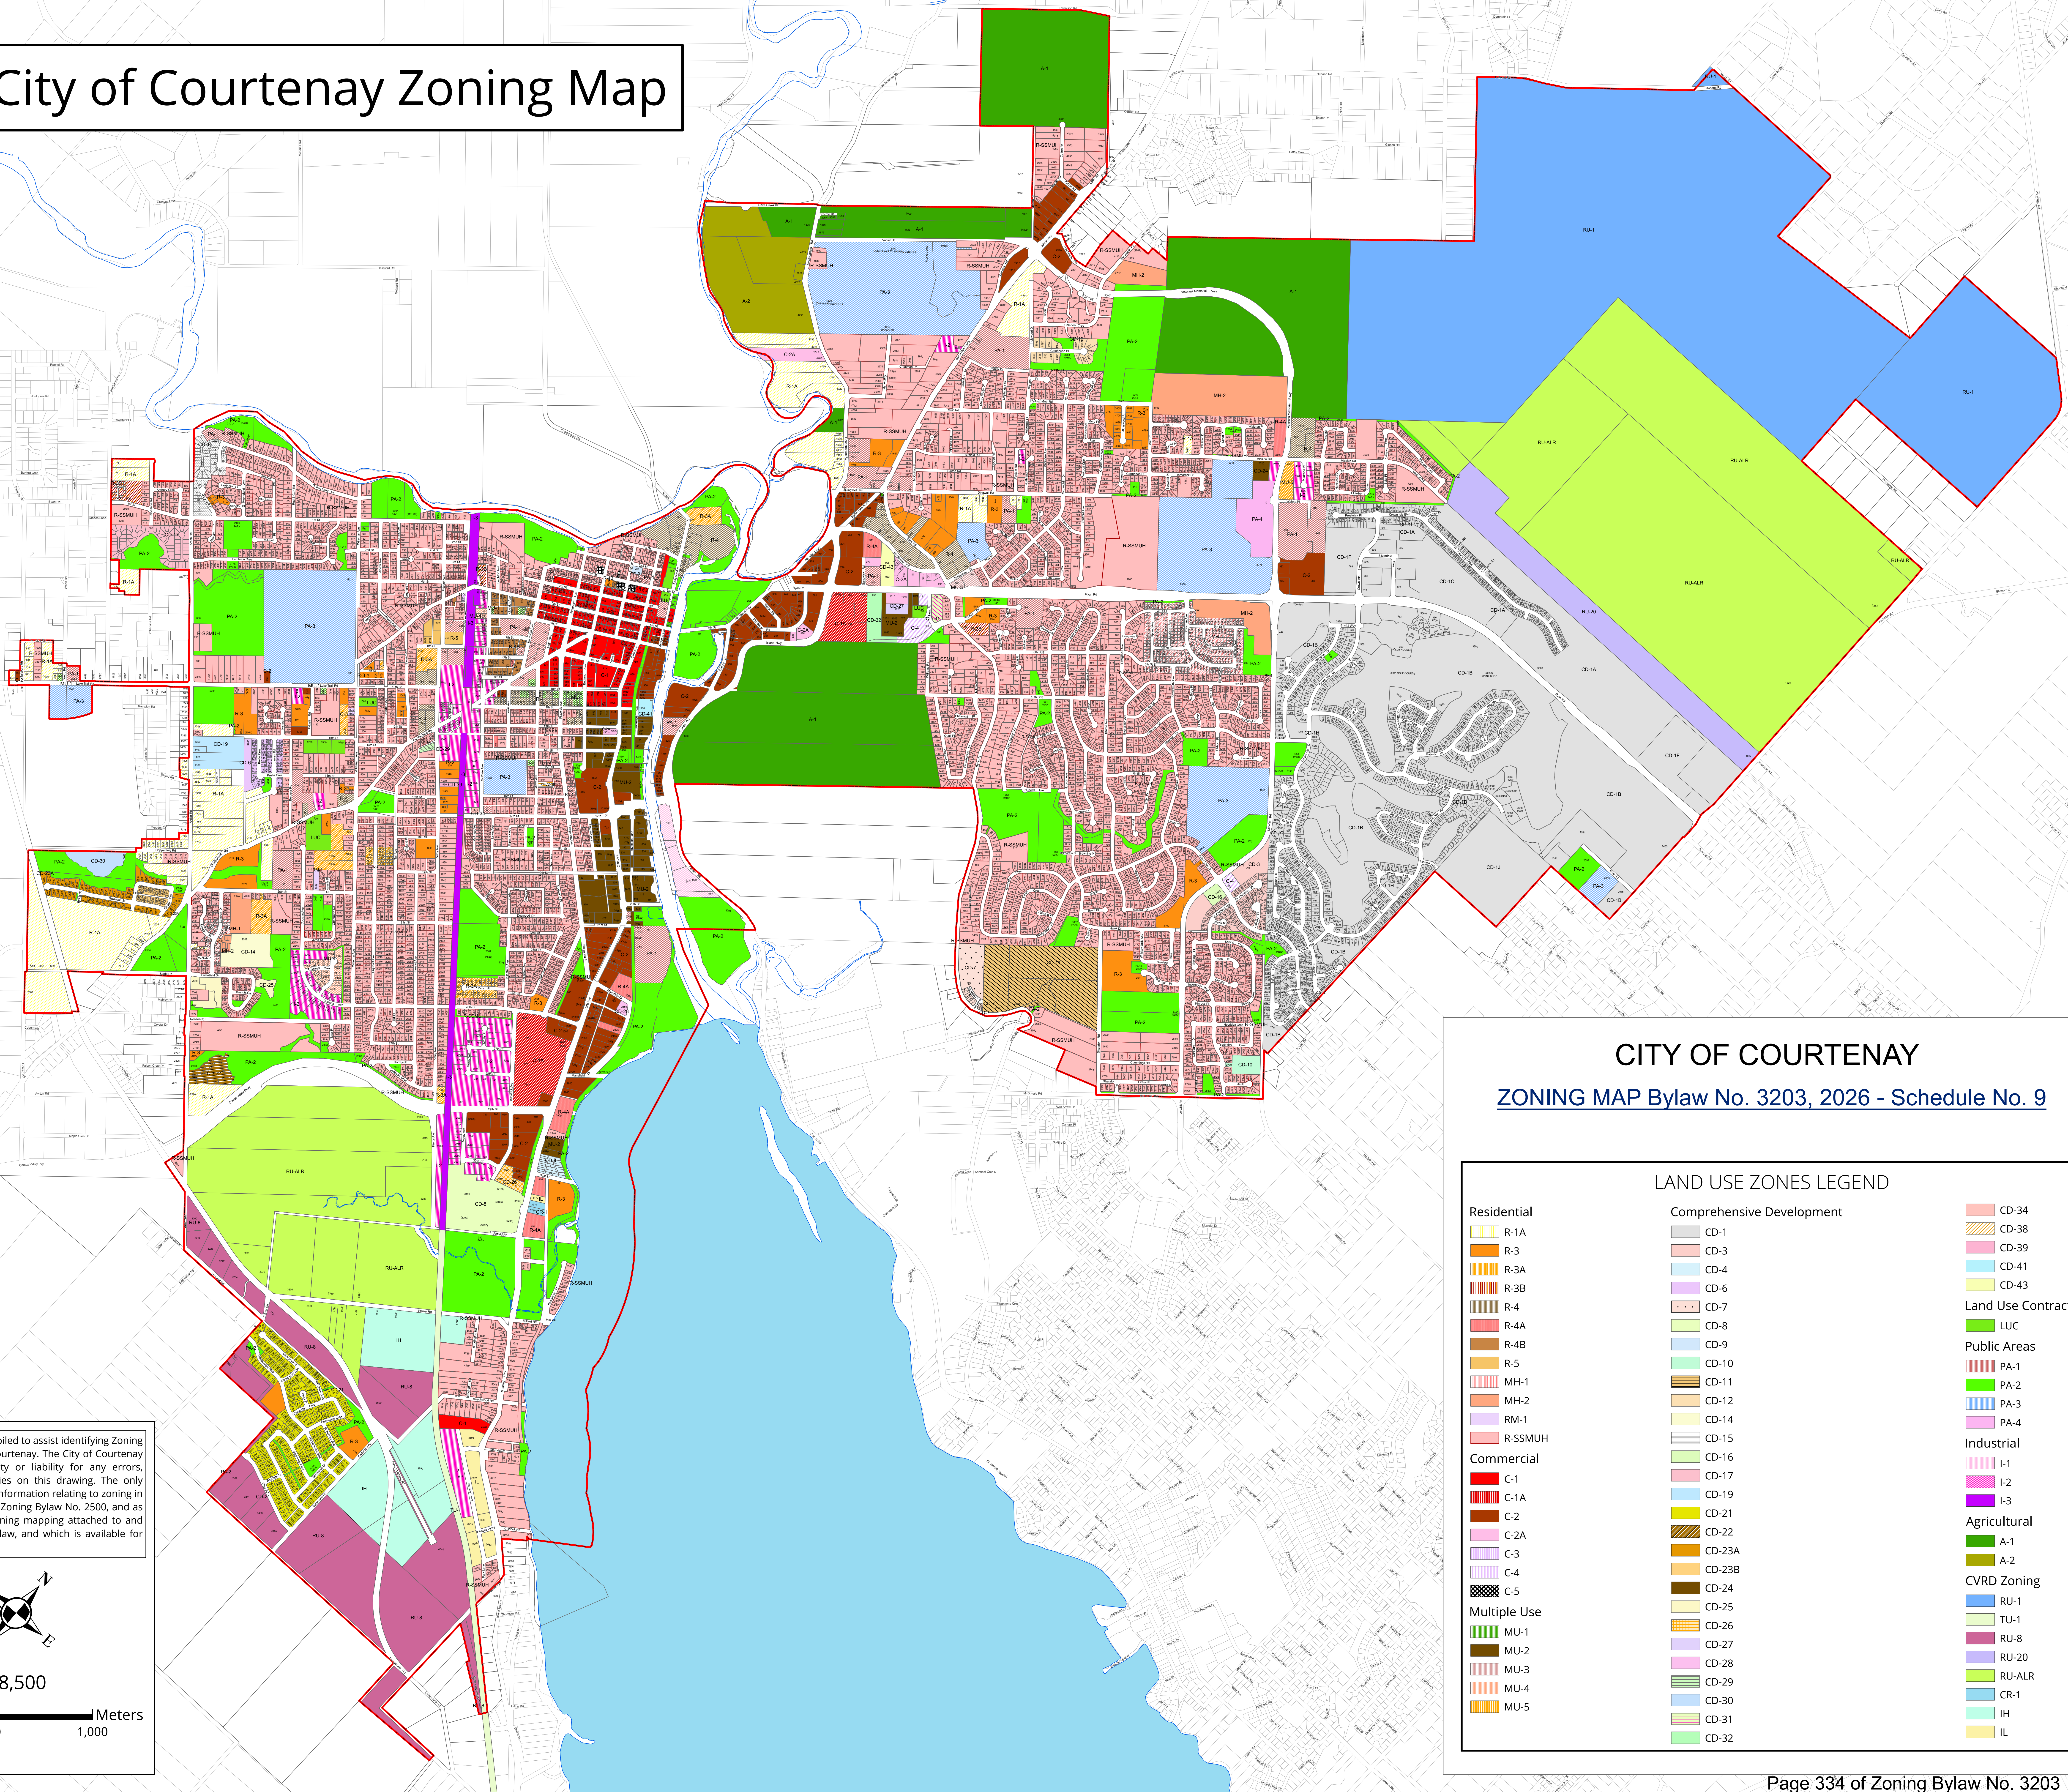

Guidelines

1. Land shall be safe for the intended use or measures required for the land to be safe for the intended use provided.
2. A report shall be provided completed by a professional engineer or geoscientist experienced in geotechnical engineering indicating the land is safe for the intended use or measures required for the land to be safe for the intended use, in accordance with the Development Permit Area guidelines.

3. Development shall be designed to minimize any alterations to the steep slope and to reflect the site rather than altering the site to reflect the development.
4. Where risk slope stabilization measures are proposed, bioengineering approaches should be proposed prior to hard engineering solutions.
5. Buildings or permanent structures shall not be constructed in areas subject to steep slope hazardous conditions.
6. Buildings and structures shall be sited in accordance with setbacks determined by the City or a geotechnical report by a qualified professional.
7. As much as possible, the site should be designed to avoid the need for retaining walls.
8. Existing vegetation should be maintained to absorb water, minimize erosion and protect the slope.
9. Natural slopes of 30 per cent or more should be maintained as natural open space.
10. Disturbed slopes shall be revegetated where gullied or bare soil is exposed as per a qualified professional's report.
11. Fill, excavated material, sand or soil should be avoided near the top of slope.
12. Section 219 restrictive covenants may be required for areas that have been identified as hazardous.
13. The alteration of land, including vegetation, subdivision, or construction of, addition to or alteration of a building or structure should be in accordance with any required professional engineer or geoscientist report including any measures specified for the land to be safe for the intended use.

This plan has been compiled to assist identifying Zoning by-laws in the City of Courtenay. The City of Courtenay accepts no responsibility or liability for any errors, omissions or inaccuracies on this drawing. The only authoritative source of information relating to zoning in the City of Courtenay is Zoning Bylaw No. 2500, and as shown in the official zoning mapping attached to and forming part of that bylaw, and which is available for review at City Hall.
